Japan and the New World Order

Global Investments, Trade and Finance

Springer Under the new world order, Japan's international business activity is being organised through tight networks that link banks, industrial corporations and trading companies and that are displacing onto Asia their main domestic problems. Since the US and Europe are refusing to fulfil that function, Japan is forming a new three-zone strategy in which production, marketing and finance are tightly coordinated within each zone but in which there is also an overall shift away from North America and Europe towards Asia.

Japanese Business Management

Restructuring for Low Growth and Globalisation

Routledge In this study the views of Japan's leading experts on the globalization of Japanese business, management and industrial relations explain how traditional Japanese-style management is responding to the changes following the collapse of the bubble economy. The areas covered include the changes made in management itself inside Japan and also how it is adapting itself when transferred overseas. The book demonstrates how management is moving towards a hybrid type in overseas operations and towards a western-style in Japan, where contractual principles are beginning to be given greater weight.

Facing Asia - Japan's Role in the Political and Economic Dynamism of Regional Cooperation

IUDICIUM Verlag Facing Asia examines the political and economic processes of regionalism and regionalization in Asia with a focus on Japan and Japanese actors. The articles by eminent scholars address the forces that tie the region together. They treat topics ranging from Japanese bilateral and multilateral ODA and the activities of state and non-state actors on the regional level to issues such as Japanese multinational corporations, foreign direct investment in Asia, and regional financial institutions. Methodologically, the authors draw on disciplinary strengths in either the social sciences or economics while organizing their treatment around a shared political-economic perspective. By looking at Asia through an interdisciplinary lens, the volume offers something to anyone interested in Japanese involvement in the politics and economics of the region. In the final chapter, the editors weave together the different approaches to Japan's place in Asian regional cooperation in the 1990s and beyond.

Multinationals, Technology and Localization in Automotive Firms in Asia

Routledge East Asia has led rapid economic growth in the last few decades with India joining them over the last five years. Automotive parts manufacturers have been an important component of domestic production in all these economies. Experts with several years of multi-disciplinary research experience on the field examine the actual and potential technological and localization implications of MNC operations in East Asia and India. The rich collection of country experiences are both original and incisive. This volume includes: Case studies from China, Japan, India, Thailand and Malaysia A study of the role of multinationals in Asian technology building An examination of the growing Chinese automobile sector Featuring leading academics from across Asia, this title is essential reading for those studying industrial growth in the continent's major economies.
