THE PATCHWORK OF WORLD HISTORY IN TEXAS HIGH SCHOOLS

UNPACKING EUROCENTRISM, IMPERIALISM, AND NATIONALISM IN THE CURRICULUM, 1920-2021

Taylor & Francis This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas, a populous and nationally influential state, over the last hundred years. The author argues that the course has dynamically evolved to reflect a patchwork of competing visions that have intersected over the past century, with each new framework partially but never completely erasing or replacing those that came before. The first part of the book presents an overview of the World History course supported by a numerical analysis of textbook content and public documents, whilst the second focuses on the depiction of non-Western peoples, and persistent narratives of Eurocentrism, imperialism, and nationalism. It ultimately concludes that a more global, accurate, and balanced curriculum is possible, despite the tension between the ideas of professional world historians, who often de-center the nation-state in their quest for a truly global approach to the subject, and the historical core rationale of state-sponsored education in the United States: to produce loyal citizens. Offering a new, conceptual understanding of how colonial themes in world history curriculum have been dealt with in the past and are now engaged with in contemporary times, it provides essential context for scholars and educators with interests in the history of education, curriculum studies, and the teaching of World History in the United States.

FERTILIZERS, PILLS & MAGNETIC STRIPS

THE FATE OF PUBLIC EDUCATION IN AMERICA

IAP Now available for Kindle. Click here. "We shape our tools and then they shape us." With these words, Kenneth Boulding captured one of the great truths of the modern world. In Fertilizers, Pills, and Magnetic Strips, Gene V Glass analyzes how a few key technological inventions changed culture in America and how public education has changed as a result. Driving these changes are material self-interest and the desire for comfort and security, both of which have transformed American culture into a hyper-consuming, xenophobic society that is systematically degrading public education. Glass shows how the central education policy debates at the start of the 21st century (vouchers, charter schools, tax credits, high-stakes testing, bilingual education) are actually about two underlying issues: how can the costs of public education be cut, and how can the education of the White middle-class be "quasi-privatized" at public expense? Working from the demographic realities of the past thirty years, he projects a challenging and disturbing future for public education in America.

CRITICAL THINKING AND FORMATIVE ASSESSMENTS

INCREASING THE RIGOR IN YOUR CLASSROOM

Routledge Develop your students' critical thinking skills and prepare them to perform competitively in the classroom, on state tests, and beyond. In this book, Moore and Stanley show you how to effectively instruct your students to think on higher levels, and how to assess their progress. As states implement the Common Core State Standards, teachers have been called upon to provide higher levels of rigor in their classrooms. Moore and Stanley demonstrate critical thinking as a key approach to accomplishing this goal. They explore the benefits of critical thinking and provide the tools you need to develop and monitor critical thinking skills in the classroom. Topics include: The Difference Between Higher-Level and Lower-Level Thinking Writing Higher-Level Thinking Questions Assessing Critical Thinking Strategies to Develop Higher-Level Thinking Skills
