## Affordable Credit

## The Way Forward

*Policy Press The poor pay more for many things but, arguably, it is the extra they pay for credit that puts the greatest strain on their budgets. This report looks beyond the rhetoric that has dominated much of the debate on high-cost credit to examine the scope for widening access to more affordable credit. The report explores what people on low incomes want from a credit source. It also analyses the constraints on lending to poor people. It looks at the scope for reducing the costs of lending and widening access to more affordable credit, and estimates the scale of demand for affordable credit. This report should be read by commercial and not-for-profit lenders, campaigners, policymakers and anyone studying or researching issues around poverty and financial exclusion.*

## Basics of Musculoskeletal Ultrasound

*Springer Nature* The field of musculoskeletal ultrasound has rapidly advanced in the past several years. The scanning protocols in particular have become more sophisticated and more standardized. Now in its fully revised and expanded second edition, this volume is the definitive resource on musculoskeletal ultrasound for the beginning practitioner. A new, first of its kind chapter has been added on ultrasound in Sports Medicine Emergencies. This expands the book topic from using POCUS as an office tool to its use on the athletic field to assist with emergencies. This new and detailed chapter includes the acute evaluation of an eye injury, lung, Morrison's pouch, IV access, fluid status, soft tissue and DVT protocols. Conforming to an identical chapter format, all previous chapters have been expanded and updated. Images have been reformatted to larger, clearer versions in addition to probe placement images going from black and white to full color. This book is divided into five different sections. It begins with chapters on the upper extremity such as the hand and wrist. The next section focuses on the lower extremity such as the foot and knee. The third section is nerve based and describes brachial plexus and major peripheral nerves. The fourth section covers Sports Medicine POCUS Emergencies. The last section details specific procedures such as I&D of abscess and hydrodissection. Each chapter follows a standard structure. They open with an approach to the patient, which contains the main pathology and clinical exam. The surface anatomy and ultrasound-based anatomy are then addressed. A discussion on patient positioning and probe settings follows. Pearls, pitfalls and red flags offer tips and pointers on scanning techniques as well as pathology not to be missed. Finally, each chapter is closed out with a summary report. *Basics of Musculoskeletal Ultrasound, 2e* is a must-have reference for residents, fellowship directors, fellows and primary care physicians as well as athletic trainers, physician assistants, physical therapists and ultrasound technicians. It is also an excellent resource for participants of the AMSSM MSK ultrasound courses.

## Leadership and Diversity

## Challenging Theory and Practice in Education

*SAGE* 'What makes this book stand out in the crowd is the engaging approach the authors have taken to present their argument and the novel treatment they offer of diversity and diversity management...a must-read for anyone in a leadership position or interested in investigating education leadership and diversity' - *Gender and Education* 'The authors should be congratulated for tackling the crucial topic of diversity within educational leadership....the book makes a major contribution to the small but emergent body of studies in this area' - *Journal of Educational Administration & History* 'This book sets out a central aim of stimulating reflection on diversity and

implications for leaders in education. It also aims to support the development of practice. It is a useful book for those involved in educational management and for policy makers at all levels' - ESCalate 'The authors challenge the reader to reconsider leadership theory in light of notions of social justice and diversity, and to put into place newly articulated frameworks for action...The text is richly supported by strong empirical research and a sometimes-intricate philosophical approach in making its case for justice and fairness in education and beyond' - Choice Magazine What do we mean by diversity? Why is it an important issue for leaders of schools, colleges and universities? As society becomes increasingly diverse, there is significant international awareness in education about how this impacts on leaders and leadership. For decades the emphasis has been placed on increasing the number of leaders with specific attributes, such as women or those from ethnic minorities, to encourage a true representation of society. This far-reaching book takes a wider view, challenging the reader to recognise the importance of diversity issues and to embed diversity as central within leadership theory and practice. Drawing on their extensive research the authors establish a clear understanding of what diversity means and use this to develop a distinct approach to conceiving leadership, preparing leaders and acting as leaders. They explain how diversity should be a holistic issue which touches every aspect of leadership and is vital to ensuring effective and appropriate leadership for education in pluralist societies. The authors explore the history of approaches to addressing inequities in access to leadership positions and the experience of leadership, from equal opportunities, to diversity and inclusion, to capabilities approaches. The book also proposes fundamental and concrete changes that leaders can undertake both in their own and their organisation's practice, to reflect a real commitment to social justice in a diverse society.

## The Film Experience

## An Introduction

Bedford/St. Martin's *The Film Experience* is a comprehensive introduction to film that treats students as the avid movie fans they are while surpassing all other texts in helping them understand the art form's full scope, breadth, and depth. Like other introductory texts, it offers strong coverage of film's formal elements, but goes further by situating this formal knowledge in the larger cultural contexts that inform the ways that we all view film. The authors' rich narrative integrates the cultural history of film throughout and demonstrates how the elements, practices, economics, and history of the medium contribute to a film's many possible meanings. The outstanding art program — now in full color — visually reinforces all the key concepts and techniques discussed in the text.

## Industrial Entomology

Springer This book is a compilation of writings focused on conventional and unconventional insect products. Some of these products are commercial successes, while others are waiting to be launched and are the potential produce of the future. In addition to the well known products honey, mulberry silk, and lac, the book primarily concentrates on silk producing insects other than the mulberry silkworm, insects as food, as sources of medicines, pest and weed managers, and as pollinators. The book highlights the all pervasive role of insects in improving human lives at multiple levels. Accordingly, while most books on insects concentrate on how to limit growth in their population, it instead focuses on how to propagate them. In each chapter, the book brings to the fore how insects are far more beneficial to us than their well publicised harmful roles. This book approaches both unconventional and conventional insect products, such as honey, silk and lac in much more depth than the available literature. It investigates different aspects of the production of these insects, such as the related processes, problems and utilities, in dedicated chapters. Because this book deals with the production of insects or their produce, it has been named *Industrial Entomology*, perhaps the only book that truly reveals the tremendous potential of insects to help humans live better lives. Based on the research and working experience of the contributors, who are global experts in their respective fields, it provides authentic, authoritative and updated information on these topics. The book offers a unique guide for students, teachers, policy planners, small scale industrialists, and government ministries of agriculture and industry across the globe. It will provide a much required stimulus to insect appreciation and generate enthusiasm for research and the broader acceptance for insect produce. Hopefully, it will also present the Indian perspective on these topics to a global readership.

## Rainfed Farming Systems

*Springer Science & Business Media* While a good grasp of the many separate aspects of agriculture is important, it is equally essential for all those involved in agriculture to understand the functioning of the farming system as a whole and how it can be best managed. It is necessary to re-assess and understand rain-fed farming systems around the world and to find ways to improve the selection, design and operation of such systems for long term productivity, profitability and sustainability. The components of the system must operate together efficiently; yet many of the relationships and interactions are not clearly understood. Appreciation of these matters and how they are affected by external influences or inputs are important for decision making and for achieving desirable outcomes for the farm as a whole. This book analyses common rain-fed farming systems and defines the principles and practices important to their effective functioning and management.

## Resolving the European Debt Crisis

*Peterson Institute* What began as a relatively localized crisis in Greece in early 2010 soon escalated to envelop Ireland and Portugal. By the second half of 2011, the contagion had spread to the far larger economies of Italy and Spain. In mid-September the Peterson Institute and Bruegel hosted a conference designed to contribute to the formulation of policies that could help resolve the euro area debt crisis. This volume presents the conference papers; several are updated through end-2011. European experts examine the political context in Greece (Loukas Tsoukalis), Ireland (Alan Ahearne), Portugal (Pedro Lourtie), Spain (Guillermo de la Dehesa), Italy (Riccardo Perissich), Germany (Daniela Schwarzer), and France (Zaki Laïdi). Lessons from past debt restructurings are then examined by Jeromin Zettelmeyer (economic) and Lee Buchheit (legal). The two editors separately consider the main current policy issues: debt sustainability by country, private sector involvement and contagion, alternative restructuring approaches, how to assemble a large emergency financing capacity, whether the European Central Bank (ECB) should be a lender of last resort, whether joint-liability "eurobonds" would be feasible and desirable, and the implications of a possible break-up of the euro area. The luncheon address by George Soros and a description (by Steven R. Weisman with Silvia B. Merler) of the policy simulation game played on the second day of the conference complete the volume. Involving market participants and experts representing the roles of euro area governments, the ECB, IMF, G-7, and credit rating agencies, the game led to a proposal for leveraging the capacity of the European Financial Stability Facility through arrangements with the ECB.

## Standards Matter

### A Review of Best Practice in Promoting Good Behaviour in Public Life, Thirteenth Report of the Committee on Standards in Public Life

*The Stationery Office The Committee for Standards in Public Life felt that the time was right to undertake a review of the key lessons that have been learnt since the Nolan Committee's first report (ISBN 9780101285025) was published in 1995 about how to improve ethical standards in public life - to stand back and reflect on what has been achieved and what still needs to be done. The report argues that much of the basic infrastructure to improve standards is now in place. Statements of key principles and codes of conduct have been adopted by most public bodies, new regulators have been created or had their existing remits clarified, and awareness of principles such as integrity, accountability and openness has increased considerably. The Committee believes standards of behaviour in many areas of public life have improved. But the Committee finds it disturbing that concerns continue to be raised about the integrity of so many of the country's key institutions or those within them; and the evidence of the last few years and months suggests that there is still much to do before the high standards in public life to which we all aspire are fully internalised in the cultures of all our public institutions. The report concludes that the need now is not for more principles, codes or regulators but rather for the existing arrangements to be more consistently and actively implemented.*

## That Summer at Boomerang

*A lively account of the little known story about the birth of surfing in Australia and the early beginnings of our beach culture and sporting heritage. The story centres on the meeting of a young Australian girl, Isabel Letham and the legendary Hawaiian swimmer and surfer, Duke Kahanamoku who visits Sydney on an exhibition swim in 1914. The narrative begins in Hawaii, tracing the renaissance of surfing after decades of missionary prohibition, and the rise of the Waikiki beach boys as tourism begins to transform the pineapple port of Honolulu. That summer at Boomerang recreates pre-World War I Australia and tells a tale of our collective loss of innocence via the story of the charismatic Duke Kahanamoku - Hawaii's best surfer and swimmer, who comes to our shores one summer and picks an average Aussie girl out of the audience to ride his long board with him. When he lifts Isabel onto his shoulders to ride the wave into shore before a packed beach, it's a symbol of the seismic change that is already rippling through the nation as the rules and regulations of the 19th century give way to the anything-goes beach culture we recognise today. The story centres on Sydney, Australia, but moves between Honolulu, Hawaii, Stockholm and the Olympics in 1912, and even California (where the Duke eventually goes in search of a Hollywood film career, followed by Isabel). But many more characters from history people these pages - such as novelist Jack London, our first sport promoter Hugh 'Huge Deal' McIntosh as well as other sporting greats - as one season, one summer, epitomises the end of an era and the birth of a new one.*
