Imperialism

The Highest Stage of Capitalism

Penguin UK Explains the inevitable flaws and destructive power of Capitalism: that it would lead unavoidably to imperialism, monopolies and colonialism.

How to Hide an Empire

A Short History of the Greater United States

Random House 'Wry, readable and often astonishing... A provocative and absorbing history of the United States' *New York Times* The United States denies having dreams of empire. We know America has spread its money, language and culture across the world, but we still think of it as a contained territory, framed by Canada above, Mexico below, and oceans either side. Nothing could be further from the truth. This is the story of the United States outside the United States - from nineteenth-century conquests like Alaska and Puerto Rico to the catalogue of islands, archipelagos and military bases dotted around the globe. Full of surprises and previously forgotten episodes, this fascinating book casts America's history, and its present, in a revealing new light.

The Long Game

China's Grand Strategy to Displace American Order

Oxford University Press In *The Long Game*, Rush Doshi demonstrates that China is in fact playing a long, methodical game to replace America as a global hegemon. Drawing from a rich base of Chinese primary sources, including decades worth of party documents and memoirs by party leaders, he traces the basic evolution of Chinese strategy, showing how it evolved in response to changes in US policy and the US's position in the world order.

Our World's Story

The New Imperialism

OUP Oxford People around the world are confused and concerned. Is it a sign of strength or of weakness that the US has suddenly shifted from a politics of consensus to one of coercion on the world stage? What was really at stake in the war on Iraq? Was it all about oil and, if not, what else was involved? What role has a sagging economy played in pushing the US into foreign adventurism and what difference does it make that neo-conservatives rather than neo-liberals are now in power? What exactly is the relationship between US militarism abroad and domestic politics? These are the questions taken up in this compelling and original book. Closely argued but clearly written, 'The New Imperialism' builds a conceptual framework to expose the underlying forces at work behind these momentous shifts in US policies and politics. The compulsions behind the projection of US power on the world as a 'new imperialism' are here, for the first time, laid bare for all to see. This new paperback edition contains an Afterword written to coincide with the result of the 2004 American presidential election.

The Eagle and the Dragon

Globalization and European Dreams of Conquest in China and America in the Sixteenth Century

John Wiley & Sons In this important new book the renowned historian Serge Gruzinski returns to two episodes in the sixteenth century which mark a decisive stage in global history and show how China and Mexico experienced the expansion of Europe. In the early 1520s, Magellan set sail for Asia by the Western route, Cortes seized Mexico and some Portuguese based in Malacca dreamed of colonizing China. The Aztec Eagle was destroyed but the Chinese Dragon held strong and repelled the invaders - after first seizing their cannon. For the first time, people from three continents encountered one other, confronted one other and their lives became entangled. These events were of great interest to contemporaries and many people at the time grasped the magnitude of what was going on around them. The Iberians succeeded in America and failed in China. The New World became inseparable from the Europeans who were to conquer it, while the Celestial Empire became, for a long time to come, an unattainable goal. Gruzinski explores this encounter between civilizations that were different from one another but that already fascinated contemporaries, and he shows that our world today bears the mark of this distant age. For it was in the sixteenth century that human history began to be played out on a global stage. It was then that connections between different parts of the world began to accelerate, not only between Europe and the Americas but also between Europe and China. This is what is revealed by a global history of the sixteenth century, conceived as another way of reading the Renaissance, less Eurocentric and more in tune with our age.

Orientalism

Western Conceptions of the Orient

Penguin UK 'A stimulating, elegant yet pugnacious essay'—Observer In this highly acclaimed seminal work, Edward Said surveys the history and nature of Western attitudes towards the East, considering Orientalism as a powerful European ideological creation—a way for writers, philosophers and colonial administrators to deal with the 'otherness' of Eastern culture, customs and beliefs. He traces this view through the writings of Homer, Nerval and Flaubert, Disraeli and Kipling, whose imaginative depictions have greatly contributed to the West's romantic and exotic picture of the Orient. In the Afterword, Said examines the effect of continuing Western imperialism.

Global Trends 2030

Alternative Worlds : a Publication of the National Intelligence Council

U.S. Government Printing Office This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

Japanese Imperialism, 1894-1945

Oxford University Press This is a study of the origins and nature of Japanese imperialism from the Sino-Japanese war of 1894-1895 through to 1945. Japan is the only Asian country in modern times to have built both a successful industrial economy and an empire, and it is Professor Beasley's contention that these two phenomena are closely related. Japan's aims were influenced by its experience of western imperialism and its own growing industrialization, but as external circumstances changed and Japan's capacity grew, so did its needs and ambitions. The creation of the Japanese empire is one of the most remarkable exploits of the twentieth century. Professor Beasley has provided a much-needed scholarly investigation into its development, expansion, and eventual destruction.

Implicit Motives

Oxford University Press - How do unconscious motivational needs (i.e., implicit motives) influence physiological, cognitive, affective, and behavioral responses to incentives? - How can implicit motives be measured? - How are they shaped by culture, how do they influence political and societal processes? - Why are they often mismatched with the explicit beliefs people have about their motivational needs and what are the consequences of such mismatches? - How can we use knowledge about implicit motives in clinical, business, and school contexts to help people achieve their goals? These are some of the topics this comprehensive book presents in 18 clearly written chapters, contributed by leading authorities in the field. It represents a state-of-the-art reference for all researchers and practitioners interested in human motivation. Bringing together exciting new research on a central topic in human motivation, this volume is an important addition to the libraries of personality, social, and cognitive psychologists, affective and social neuroscientists, clinical psychologists, as well as graduate students in these fields and practitioners.

Cinema, Transnationalism, and Colonial India

Entertaining the Raj

Routledge Through the lens of cinema, this book explores the ways in which the United States, Britain and India impacted each other politically, culturally and ideologically. It argues that American films of the 1920s posited alternative notions of whiteness and the West to that of Britain, which stood for democracy and social mobility even at a time of virulent racism. The book examines the impact that the American cinema has on Indian filmmakers of the period, who were integrating its conventions with indigenous artistic traditions to articulate an Indian modernity. It considers the way American films in the 1920s presented an orientalist fantasy of Asia, which occluded the harsh realities of anti-Asian sentiment and legislation in the period as well as the exciting engagement of anti-imperial activists who sought to use the United States as the base of a transnational network. The book goes on to analyse the American 'empire films' of the 1930s, which adapted British narratives of empire to represent the United States as a new global paradigm. Presenting close readings of films, literature and art from the era, the book engages cinema studies with theories of post-colonialism and transnationalism, and provides a novel approach to the study of Indian cinema.

Industrial Colonialism in Latin America

The Third Stage

BRILL The main underlying contradictions in Latin American development are exposed through a systemic analysis of "industrial colonialism." Figueroa's critical analysis of present imperialism and the neoliberal mode of knowledge creation provides fresh insights into contemporary underdevelopment and the prerequisites for genuine development in the region.

BRILL This book draws on Pashukanis, critical legal studies and the history of international regulation to critique existing theories of international law. It constructs an alternative Marxist approach, and argues that imperialism is intrinsic to international law.

The Commanding Heights

The Battle Between Government And The Marketplace

Simon and Schuster *The most powerful force in the world economy today is the redefinition of the relationship between state and marketplace - a process that goes by the name of privatization though this term is inadequate to express its far-reaching changes. We are moving from an era in which governments sought to seize and control the 'commanding heights' of the economy to an era in which the idea of free markets is capturing the commanding heights of world economic thinking. Basic views of how society ought to be organized are undergoing rapid change, trillions of dollars are changing hands and so is fundamental political power. Great new wealth is being created - as are huge opportunities and huge risks. Taking a worldwide perspective, including Britain, where the process began with Mrs Thatcher, Europe and the former USSR, China, Latin America and the US, THE COMMANDING HEIGHTS shows how a revolution in ideas is transforming the world economy - why it is happening, how it can go wrong and what it will mean for the global economy going into the twenty-first century.*

Native American Environmentalism

Land, Spirit, and the Idea of Wilderness

U of Nebraska Press *Originally titled: Land and spirit in native America, 2012.*

Land and Spirit in Native America

ABC-CLIO *When white Europeans first encountered Native American cultures, they often regarded Indian ideas about the earth and the spiritual world as evidence of their ignorance and primitive society. Now, traditional Indian wisdom that emphasizes the importance of maintaining balance within specific places is especially valuable and relevant as we grapple with sweeping environmental changes.*

Resources in Education

Empires in World History

Power and the Politics of Difference

Princeton University Press *How empires have used diversity to shape the world order for more than two millennia Empires—vast states of territories and peoples united by force and ambition—have dominated the political landscape for more than two millennia. Empires in World History departs from conventional European and nation-centered perspectives to take a remarkable look at how empires relied on diversity to shape the global order. Beginning with ancient Rome and China and continuing across Asia, Europe, the Americas, and Africa, Jane Burbank and Frederick Cooper examine empires' conquests, rivalries, and strategies of domination—with an emphasis on how empires accommodated, created, and manipulated differences among populations. Burbank and Cooper examine Rome and China from the third century BCE, empires that sustained state power for centuries. They delve into the militant monotheism of Byzantium, the Islamic Caliphates, and the short-lived Carolingians, as well as the pragmatically tolerant rule of the Mongols and Ottomans, who combined religious protection with the politics of loyalty. Burbank and Cooper discuss the influence of empire on capitalism and popular sovereignty, the limitations and instability of Europe's colonial projects, Russia's repertoire of exploitation and differentiation, as well as the "empire of liberty"—devised by American revolutionaries and later extended across a continent and beyond. With its investigation into the relationship between diversity and imperial states, Empires in World History offers a fresh approach to understanding the impact of empires on the past and present.*
