Operation Overflight

Potomac Books, Inc. In this new edition of his classic 1970 memoir about the notorious U-2 incident, pilot Francis Gary Powers reveals the full story of what actually happened in the most sensational espionage case in Cold War history. After surviving the shoot-down of his reconnaissance plane and his capture on May 1, 1960, Powers endured sixty-one days of rigorous interrogation by the KGB, a public trial, a conviction for espionage, and the start of a ten-year sentence. After nearly two years, the U.S. government obtained his release from prison in a dramatic exchange for convicted Soviet spy Rudolph Abel. The narrative is a tremendously exciting suspense story about a man who was labeled a traitor by many of his countrymen but who emerged a Cold War hero.

Mental Capacity Act 2005 code of practice

[large print 2007 final edition]

The Stationery Office The Mental capacity Act 2005 provides a statutory framework for people who lack the capacity to make decisions for themselves, or for people who want to make provision for a time when they will be unable to make their own decisions. This code of practice, which has statutory force, provides information and guidance about how the Act should work in practice. It explains the principles behind the Act, defines when someone is incapable of making their own decisions and explains what is meant by acting in someone's best interests. It describes the role of the new Court of Protection and the role of Independent Mental Capacity Advocates and sets out the role of the Public Guardian. It also covers medical treatment and the way disputes can be resolved.

The Green Book

Appraisal and Evaluation in Central Government : Treasury Guidance

Stationery Office This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

Code of Practice

Mental Health Act 1983

The Stationery Office This Code of Practice is a reference tool for those dealing with, and caring for people admitted to hospital and care homes with mental health problems. Authored by the Department of Health and produced following wide consultation with those who provide and receive services under the Mental Health Act, this publication will come into force on 3 November 2008. Through the Mental Health Act 2007, the Government has updated the 1983 Act to ensure it keeps pace with the changes in the way that mental health services are - and need to be - delivered. This publication provides guidance and advice to registered medical practitioners, approved clinicians, managers and staff of hospitals, and approved mental health professionals on how they should proceed when undertaking duties under the Act. It also gives guidance to doctors and other professionals about certain aspects of medical treatment for mental disorder more generally. The Mental Health Act Code of Practice is also aimed at all of those working in primary care, Mental Health Trusts, NHS Foundation Trusts as well as solicitors and attorneys who advise on mental health law. The Code should also be beneficial to the police and ambulance services and others in health and social services (including the independent and voluntary sectors) involved in providing services to people who are, or may become, subject to compulsory measures under the Act. It will also be a guide for those working with people with specific mental health needs such as those in nursing and care homes, and those in prison.

The Eagle and the Dragon

Globalization and European Dreams of Conquest in China and America in the Sixteenth Century

John Wiley & Sons In this important new book the renowned historian Serge Gruzinski returns to two episodes in the sixteenth century which mark a decisive stage in global history and show how China and Mexico experienced the expansion of Europe. In the early 1520s, Magellan set sail for Asia by the Western route, Cortes seized Mexico and some Portuguese based in Malacca dreamed of colonizing China. The Aztec Eagle was destroyed but the Chinese Dragon held strong and repelled the invaders - after first seizing their cannon. For the first time, people from three continents encountered one other, confronted one other and their lives became entangled. These events were of great interest to contemporaries and many people at the time grasped the magnitude of what was going on around them. The Iberians succeeded in America and failed in China. The New World became inseparable from the Europeans who were to conquer it, while the Celestial Empire became, for a long time to come, an unattainable goal. Gruzinski explores this encounter between civilizations that were different from one another but that already fascinated contemporaries, and he shows that our world today bears the mark of this distant age. For it was in the sixteenth century that human history began to be played out on a global stage. It was then that connections between different parts of the world began to accelerate, not only between Europe and the Americas but also between Europe and China. This is what is revealed by a global history of the sixteenth century, conceived as another way of reading the Renaissance, less Eurocentric and more in tune with our age.

Immunisation against infectious diseases

The Stationery Office This is the third edition of this publication which contains the latest information on vaccines and vaccination procedures for all the vaccine preventable infectious diseases that may occur in the UK or in travellers going outside of the UK, particularly those immunisations that comprise the routine immunisation programme for all children from birth to adolescence. It is divided into two sections: the first section covers principles, practices and procedures, including issues of consent, contraindications, storage, distribution and disposal of vaccines, surveillance and monitoring, and the Vaccine Damage Payment Scheme; the second section covers the range of different diseases and vaccines.

Strengthening Forensic Science in the United States

A Path Forward

National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Global Trends 2030

Alternative Worlds

Military Bookshop FULL COLOR PUBLICATION. Global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. Appropriate for anyone, from business to banks, government to start-ups, technology to teachers and more, this publication helps anticipate where the world will be socially, politically, technically and culturally over the next few decades.

Grameen Social Business Model

A Manifesto for Proletariat Revolution

AuthorHouse "Muhammad Yunus is that rare phenomenon, wrote Rashidul Bari, "A Nobel Peace Prize-winning economist famous for his two theories—microcredit and social business—and famous for his successful practical work through Grameen Bank that has already helped millions of poor women break the cycle of poverty." Rashidul Bari, as a writer, is not new to the subjects of Yunus, microcredit, and social business. As a fellow Bangladeshi, he has written extensively in English and Bengali about Yunus in books, poems, and songs; in magazines and newspapers; and in films. In fact, Bari serves as the Bangladeshi James Boswell to Muhammad Yunus' Samuel Johnson. Bari's new book, Social Business; A Manifesto for Proletariat Revolution, is a long-awaited, fascinating, clearly and movingly written text in which he not only criticizes Prime Minister Hasina for unleashing her hate mongering to destroy Grameen Bank, but he also explains how microcredit, social business, and Grameen could be used as a weapon in the global battle against poverty, which kills 22,000 people every day. The book is approximately 52,000 words in length with 3 photo albums. It divided into 25 chapters. These chapters explain what Bari has witnessed and learned from Yunus and GB, to emphasize the power and promise of SB. Part I: Chapter one presents observable, empirical, and measurable evidence of poverty as the biggest challenge of the 21st century. Chapter 2 uses the narrative method to describe the history of poverty. Concern about poverty has a long tradition, as according to the Bible "the poor will always be with us." Rejecting this old notion, Yunus plans to make poverty an artifact in a museum by 2030. Chapter 3 applies the rational choice theory to the concept of social business. Chapter 4 uses the monetary poverty threshold, a concept developed by the World Bank, to measure extreme and moderate poverty, and the Gini coefficient developed by Italian mathematician Corrado Gini to measure relative poverty. Chapter 5, with 13 subdivisions, applies correlation studies to identify the causes of poverty and to illustrate how poverty creates conditions that result in 20,000 deaths every day. Chapter 6 presents the Grameen Social Business (GSB) model. Part II: Chapters 7-12 discuss the life of Muhammad Yunus, the history of microcredit, the rise of the Grameen Bank, and the utility of the GSB model. Chapter 13 deals with the criticism of the bank. Chapters 15-16 highlight women's empowerment and sustainability, which refutes some of the criticisms in previous chapters. Part III: Chapter 17 reviews the false allegations against Yunus (e.g., Tom Heinemann's "Caught in Micro Debt") and investigates why Hasina used Heinemann's documentary as an excuse to remove Yunus from Grameen Bank. Chapter 18 focuses on the Bangladesh Bank's view of the founder of Grameen Bank. Chapter 19 examines why the world is stunned by Hasina's malevolent hate campaign against Yunus and her attempts to take control of the Grameen Bank. Chapter 20 details the Bangladesh High Court decision to uphold the Bangladesh

Bank's illegal decision, which illustrates how the High Court and the Supreme Court have become a "dog sleeping at its owner's feet. Chapter 21 uses the Court of King Solomon as an important lesson that shows that the prime minister of Bangladesh has become a monster. Chapter 23 explains why an Indian immigration officer slapped Rehman Sobhan. Chapter 24 uses "the Trial of Galileo" as an important lesson that illustrates the political vendetta by Hasina against Yunus could be understood as a modern-day replay of the famous conflict between Pope Urban VIII and Galileo Galilei. Chapter 25 documents how Yunus' removal has sparked protests around the world. It also announces a manifesto for a "Grameen Revolution." The chapter explains why the inscription on Karl Marx's tomb can be adapted to Yunus' Grameen Bank: Poor people—especially the poor women of Bangladesh—UNITE.

Communities in Action

Pathways to Health Equity

National Academies Press In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

On Global Justice

Princeton University Press Debates about global justice have traditionally fallen into two camps. Statists believe that principles of justice can only be held among those who share a state. Those who fall outside this realm are merely owed charity. Cosmopolitans, on the other hand, believe that justice applies equally among all human beings. On Global Justice shifts the terms of this debate and shows how both views are unsatisfactory. Stressing humanity's collective ownership of the earth, Mathias Risse offers a new theory of global distributive justice--what he calls pluralist internationalism--where in different contexts, different principles of justice apply. Arguing that statists and cosmopolitans seek overarching answers to problems that vary too widely for one single justice relationship, Risse explores who should have how much of what we all need and care about, ranging from income and rights to spaces and resources of the earth. He acknowledges that especially demanding redistributive principles apply among those who share a country, but those who share a country also have obligations of justice to those who do not because of a universal humanity, common political and economic orders, and a linked global trading system. Risse's inquiries about ownership of the earth give insights into immigration, obligations to future generations, and obligations arising from climate change. He considers issues such as fairness in trade, responsibilities of the WTO, intellectual property rights, labor rights, whether there ought to be states at all, and global inequality, and he develops a new foundational theory of human rights.

Berwick-upon-Tweed

Three Places, Two Nations, One Town

Informed Conservation Nikolaus Pevsner described Berwick-upon-Tweed as 'one of the most exciting towns in England' [Nikolaus Pevsner, Buildings of England: Northumberland (1957), 88] - a place where an absorbing historical tale can still be read in the dense fabric of its old streets and buildings. It attracts not only day-trippers and holidaymakers but also new residents who have learnt to appreciate the spirit of the place. But outsiders all too easily confine their attention to the space within the impressive Elizabethan ramparts, while local people are sometimes unaware or dismissive of the wider significance of the very things that they know so intimately. Berwick deserves to be known better, and to be celebrated not just as a vivid reminder of what many other towns were once like, but more especially as something unique and distinctive, shaped by a peculiar combination of historical and geographical

circumstances. This distinctiveness is acutely apparent as one passes between Berwick and the contrasting, but historically intertwined, settlements of Tweedmouth and Spittal. This book presents something of the wealth of historic interest encapsulated in Berwick, Tweedmouth and Spittal, and explains how these places came to assume such varied and distinctive forms. Above all, it urges that a town anxious for stability and prosperity in the future must know where it has come from as well as where it is going.

Cost-effective and Sustainable Road Slope Stabilization and Erosion Control

Transportation Research Board "In the United States it is estimated that 75 percent of all roads are low volume roads maintained by some 35,000 local agencies. Low volume roads often omit surface slope protection, and this can lead to slope failure, erosion, and maintenance, safety, and ecological issues. This report presents information on cost effective and sustainable road slope stabilization techniques, with a focus on shallow or near surface slope stabilization and related erosion control methods used on low volume roads. To fully address this topic, planning and site investigation are discussed, as well as erosion control techniques, soil bioengineering and biotechnical techniques, mechanical stabilization, and earthwork techniques. Information presented in this report was obtained through an extensive literature review, and from survey and interview responses. From the survey responses, 30 individuals were interviewed based on the information they made available in the survey. A total of 25 interviews were conducted over the phone, and in two cases written responses were received"--Preface.

Dietary Reference Intakes for Vitamin A, Vitamin K, Arsenic, Boron, Chromium, Copper, Iodine, Iron, Manganese, Molybdenum, Nickel, Silicon, Vanadium, and Zinc

National Academies Press This volume is the newest release in the authoritative series issued by the National Academy of Sciences on dietary reference intakes (DRIs). This series provides recommended intakes, such as Recommended Dietary Allowances (RDAs), for use in planning nutritionally adequate diets for individuals based on age and gender. In addition, a new reference intake, the Tolerable Upper Intake Level (UL), has also been established to assist an individual in knowing how much is "too much" of a nutrient. Based on the Institute of Medicine's review of the scientific literature regarding dietary micronutrients, recommendations have been formulated regarding vitamins A and K, iron, iodine, chromium, copper, manganese, molybdenum, zinc, and other potentially beneficial trace elements such as boron to determine the roles, if any, they play in health. The book also: Reviews selected components of food that may influence the bioavailability of these compounds. Develops estimates of dietary intake of these compounds that are compatible with good nutrition throughout the life span and that may decrease risk of chronic disease where data indicate they play a role. Determines Tolerable Upper Intake levels for each nutrient reviewed where adequate scientific data are available in specific population subgroups. Identifies research needed to improve knowledge of the role of these micronutrients in human health. This book will be important to professionals in nutrition research and education.

U.S. Government Printing Office This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

Mysteries of the New Jerusalem

Lulu.com Mysteries of the New Jerusalem is the third book in the Mysteries of the Everlasting Kingdom series. It deals with the astonishing details about the coming New Jerusalem and how it will affect you! We won't be going to heaven (John 3:13), but heaven is coming to us (Rev. 21:2-5) Where will you be during the Great Tribulation? A great many people assume that "the church" will be spared the anguish of the Tribulation by being "raptured" into heaven. Others believe that "the church" will flee to a place of safety on earth, such as Petra, but not stay in the "place" for the full 1260 days, opting to spend a year in the "third heaven". Others plan to be in a place on earth the entire time. Some hope that believers will be protected in their homes as the nations around them are being decimated. Consider the evidence presented here and ask yourself if a Place of Safety is to be directly above us in plain view!

Poverty and Shared Prosperity 2020

Reversals of Fortune

World Bank Publications This edition of the biennial *Poverty and Shared Prosperity* report brings sobering news. The COVID-19 (coronavirus) pandemic and its associated economic crisis, compounded by the effects of armed conflict and climate change, are reversing hard-won gains in poverty reduction and shared prosperity. The fight to end poverty has suffered its worst setback in decades after more than 20 years of progress. The goal of ending extreme poverty by 2030, already at risk before the pandemic, is now beyond reach in the absence of swift, significant, and sustained action, and the objective of advancing shared prosperity—raising the incomes of the poorest 40 percent in each country—will be much more difficult. *Poverty and Shared Prosperity 2020: Reversals of Fortune* presents new estimates of COVID-19's impacts on global poverty and shared prosperity. Harnessing fresh data from frontline surveys and economic simulations, it shows that pandemic-related job losses and deprivation worldwide are hitting already poor and vulnerable people hard, while also shifting the profile of global poverty to include millions of 'new poor.' Original analysis included in the report shows that the new poor are more urban, better educated, and less likely to work in agriculture than those living in extreme poverty before COVID-19. It also gives new estimates of the impact of conflict and climate change, and how they overlap. These results are important for targeting policies to safeguard lives and livelihoods. It shows how some countries are acting to reverse the crisis, protect those most vulnerable, and promote a resilient recovery. These findings call for urgent action. If the global response fails the world's poorest and most vulnerable people now, the losses they have experienced to date will be minimal compared with what lies ahead. Success over the long term will require much more than stopping COVID-19. As efforts to curb the disease and its economic fallout intensify, the interrupted development agenda in low- and middle-income countries must be put back on track. Recovering from today's reversals of fortune requires tackling the economic crisis unleashed by COVID-19 with a commitment proportional to the crisis itself. In doing so, countries can also plant the seeds for dealing with the long-term development challenges of promoting inclusive growth, capital accumulation, and risk prevention—particularly the risks of conflict and climate change.

American Government

Continuity and Change

Longman Publishing Group This convenient Portable Version of O'Connor/Sabato's *American Government: Continuity and Change* features all the content of the original comprehensive text split into four lightweight, paperbacks—Foundations, Institutions, Political Behavior, and Public Policy—plus new practice tests for students found at the back of each volume. Guided by the belief that students must first understand how American government developed over more than two centuries to fully understand the issues facing the United States today, O'Connor/Sabato offers the strongest coverage of both history and current events of any college textbook devoted to American politics. This best-selling book provides the historical context students need to understand our government and the most crucial and controversial issues affecting the nation in the 21st century. *American Government: Continuity and Change*, has been extensively revised to provide the most in-depth and current coverage of the 2006 midterm elections, the second George W. Bush administration, the Iraq War, and increasing controversies related to the conduct of the war on terrorism, including renewed calls for additional congressional oversight of the Executive Branch. The new edition also emphasizes the extent to which shared American values shape and affect policy and influence key political conflicts.

Theological Bible Commentary

Westminster John Knox Press Most one-volume Bible commentaries focus on standard scholarly issues, answering questions such as, who wrote the book? who was addressed? and how is the book structured? In contrast, this is the first one-volume commentary to emphasize theological questions: what does each biblical book say about God? how does the book describe God and portray God's actions? and who is God in these biblical books? This volume meets the need for a resource that puts the best of scholarship in

conversation with the theological claims of the biblical text.

Pain Management and the Opioid Epidemic

Balancing Societal and Individual Benefits and Risks of Prescription Opioid Use

National Academies Press Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

Practices, Challenges, and Prospects of Digital Ethnography as a Multidisciplinary Method

IGI Global Ethnography in the digital age presents new methods for research. It encourages scientists to think about how we live and study in a digital, material, and sensory world. Digital ethnography considers the impact of digital media on the methods and processes by which we perform ethnography and how the digital, methodological, practical, and theoretical aspects of ethnographic research are becoming increasingly interwoven. This planet does not exist in a static state; as technology grows and shifts, we must learn how to appropriately analyze these changes. Practices, Challenges, and Prospects of Digital Ethnography as a Multidisciplinary Method examines the pervasiveness of digital media in digital ethnography's setting and practice. It investigates how digital settings, techniques, and procedures are reshaping ethnographic practice and explores the ethnographic-theoretical interactions through which old opinions are influenced by digital ethnography practice, going beyond merely transferring conventional concepts and techniques into digital research settings. Covering topics such as data triangulation, indigenous living systems, and digital technology, this premier reference source is an essential resource for libraries, students, teachers, sociologists, anthropologists, social workers, historians, political scientists, geographers, public health officials, archivists, government officials, researchers, and academicians.

The Threat of Pandemic Influenza

Are We Ready? Workshop Summary

National Academies Press Public health officials and organizations around the world remain on high alert because of increasing concerns about the prospect of an influenza pandemic, which many experts believe to be inevitable. Moreover, recent problems with the availability and strain-specificity of vaccine for annual flu epidemics in some countries and the rise of pandemic strains of avian flu in disparate geographic regions have alarmed experts about the world's ability to prevent or contain a human pandemic. The workshop summary, The Threat of Pandemic Influenza: Are We Ready? addresses these urgent concerns. The report describes what steps the United States and other countries have taken thus far to prepare for the next outbreak of "killer flu." It also looks at gaps in readiness, including hospitals' inability to absorb a surge of patients and many nations' incapacity to monitor and detect flu outbreaks. The report points to the need for international agreements to share flu vaccine and antiviral stockpiles to ensure that the 88 percent of nations that cannot manufacture or stockpile these products have access to them. It chronicles the toll of the H5N1 strain of avian flu currently circulating among poultry in many parts of Asia, which now accounts for the culling of millions of birds and the death of at least 50 persons. And it compares the costs of preparations with the costs of illness and death that could arise during an outbreak.
