RAF WINGS OVER FLORIDA

MEMORIES OF WORLD WAR II BRITISH AIR CADETS

Purdue University Press They fondly remember the times when they buzzed over the homes of their Florida "families" to let them know to expect them for Sunday dinner. More than fifty years later, their stories still resonate with universal emotions: fear of failure, love of country, camaraderie, romantic love, and the pain of tragic deaths. Their stories also remind the American reader of a unique time in our history, when, poised on the brink of war, the United States reached out to help a country in distress."--BOOK JACKET.

THE SEARCH FOR THE SELF IN STATIUS' ›THEBAID‹

IDENTITY, INTERTEXT AND THE SUBLIME

Walter de Gruyter GmbH & Co KG The aim of this project is to provide a sustained analysis of the concept of 'self' in Statius' Thebaid. It is this project's contention that the poem is profoundly interested in ideas of identity and selfhood. The poem stages itself as a metapoetic exploration of the difficulties for a belated epicist in finding a place in the literary canon; it shows the impossibility of squaring large-scale epic poetics with small-scale, finely-wrought Callimacheanism; it reflects the violent disjunction between Statius' authorial pose as a poet without power and the extreme violence of his poetics; it opens up the intricacies of constructing original, coherent characters out of intertextual, exemplary models. The central tenet of the project is that Statius in the Thebaid stages his own 'death', but does so that his poem may live. This book is intended for an academic audience including undergraduate and graduate students as well as specialists in the field. Although the project will be of primary importance to readers of Flavian literature, it will also be of interest to those who study intertextuality and characterisation in Roman literature more generally, selfhood and identity in Roman literature and culture and the reception of Roman literature.

CHALLENGING MATHEMATICS IN AND BEYOND THE CLASSROOM

THE 16TH ICMI STUDY

[Springer Science & Business Media](#) In the mid 1980s, the International Commission on Mathematical Instruction (ICMI) inaugurated a series of studies in mathematics education by commissioning one on the influence of technology and informatics on mathematics and its teaching. These studies are designed to thoroughly explore topics of c- temporary interest, by gathering together a group of experts who prepare a Study Volume that provides a considered assessment of the current state and a guide to further developments. Studies have embraced a range of issues, some central, such as the teaching of algebra, some closely related, such as the impact of history and psychology, and some looking at mathematics education from a particular perspective, such as cultural differences between East and West. These studies have been commissioned at the rate of about one per year. Once the ICMI Executive decides on the topic, one or two chairs are selected and then, in consultation with them, an International Program Committee (IPC) of about 12 experts is formed. The IPC then meets and prepares a Discussion Document that sets forth the issues and invites interested parties to submit papers. These papers are the basis for invitations to a Study Conference, at which the various dimensions of the topic are explored and a book, the Study Volume, is sketched out. The book is then put together in collaboration, mainly using electronic communication. The entire process typically takes about six years.
