FLUENT FOREVER

HOW TO LEARN ANY LANGUAGE FAST AND NEVER FORGET IT

Harmony NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Gitars Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn’t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he’s discovered. Starting with pronunciation, you’ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You’ll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you’ll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you’ll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

THE BLACKBIRD

AN ALAN GROFIELD NOVEL

University of Chicago Press Donald E. Westlake is one of the greats of crime fiction. Under the pseudonym Richard Stark, he wrote twenty-four fast-paced, hardboiled novels featuring Parker, a shrewd career criminal with a talent for heists. Using the same nom de plume, Westlake also completed a separate series in the Parker universe, starring Alan Grofield, an occasional colleague of Parker. While he shares events and characters with several Parker novels, Grofield is less calculating and more hot-blooded than Parker; think fewer guns, more dames. Not that there isn't violence and adventure aplenty. The third Grofield novel, *The Blackbird* shares its first chapter with *Slayground*: after a traumatic car crash, Parker eludes the police, but Grofield gets caught. Lying injured in the hospital, Grofield is visited by G-Men

who offer him an alternative to jail, and he finds himself forced into a deadly situation involving international criminals and a political conspiracy. With a new foreword by Sarah Weinman that situates the Grofield series within Westlake's work as a whole, this novel is an exciting addition to any crime fiction fan's library.

STEEL CORROSION-INDUCED CONCRETE CRACKING

Butterworth-Heinemann Steel Corrosion Induced Concrete Cracking presents the latest advances in the origin, mechanism and development of corrosion-induced cracking in concrete. It investigates topics including expansion coefficient and elastic modulus of steel corrosion, rust layer and rust distribution, spatial distribution of corrosion products, the shape of corrosion-induced cracks and so on. This book concludes by proposing an improved corrosion-induced cracking model, which considers the phenomena of the simultaneous occurrence of corrosion layer accumulation and corrosion filling in concrete. This book will be a valuable reference book for researchers and graduate students in the field of concrete durability and concrete structure, and industry engineers who are concerned with the deterioration mechanisms and the life cycle of reinforced concrete structures. Proposes a new corrosion-induced concrete cracking model, which takes into account the phenomenon of the simultaneous occurrence of corrosion layer accumulation and corrosion filling paste. Investigates the parameters and values of expansion coefficients and elastic modulus of steel corrosion, which enables a more rational prediction of concrete surface cracking. Introduces the use of the Gaussian function to describe the non-uniform spatial distribution of corrosion products.
