Life in Tanganyika in the Fifties

New Africa Press Life in Tanganyika in the 1950s and a look at race relations between whites and black Africans and others in this East African country are some of the subjects covered in the book. It's full of human interest stories, including the author's. Born and brought up in Tanganyika, the author writes from personal experience. He also got the chance to ask many ex-Tanganyikans a number of questions about life in Tanganyika in the fifties. Many of them were born and brought up in Tanganyika during the same period the author was. And many others went to Tanganyika as children but grew up there. The ex-Tanganyikans he contacted lived in different parts of the world including Tahiti, Britain, Australia, New Zealand, Canada, Italy, South Africa, Zambia, Zimbabwe, the United States, the Middle East, and Russia among others. And they all had interesting stories to tell about life in Tanganyika in the fifties. The perspectives they provided, and the memories they shared with the author about their lives in Tanganyika, are some of the most interesting aspects of this book which focuses on one of the most important periods in the history of Africa. The book is a primary source of information on

how life was then in Tanganyika during one of the most important decades in the history of the country just before independence.

Canadian Armoured Fighting Vehicle Museums and Monuments

iUniverse Major Hal Skaarup has woven together an informative and detailed synopsis of the carefully preserved and restored armoured fighting vehicles on display in Canada. He highlights the importance of these upon key turning points in history when these AFVs were in use as tools of war at home and overseas. We often associate the evolution of military prowess with the advancement of sophisticated technology. Major Skaarup's descriptions of Canadian armour as it evolved to the level it has today reveals that military planners have had to be continuously creative in adapting to the changes in modern combat. They had to devise many intricate techniques, tactics and procedures to overcome the insurgents and opposition forces faced in Afghanistan and future overseas missions where Canadian armour will be brought into play. This guide book will show the interested reader where to find examples of the historical armour preserved in Canada, and perhaps serve as a window on how Canada's military contribution to safety and security in the world has evolved.

What Technology Wants

Penguin From the author of the New York Times bestseller *The Inevitable*— a sweeping vision of technology as a living force that can expand our individual potential In this provocative book, one of today's most respected thinkers turns the conversation about technology on its head by viewing technology as a natural system, an extension of biological evolution. By mapping the behavior of life, we paradoxically get a glimpse at where technology is headed-or "what it wants." Kevin Kelly offers a dozen trajectories in the coming decades for this near-living system. And as we align ourselves with technology's agenda, we can capture its colossal potential. This visionary and optimistic book explores how technology gives our lives greater meaning and is a must-read for anyone curious about the future.
