European Elites and Ideas of Empire, 1917-1957

Cambridge University Press Explores European civilisation as a concept of twentieth-century political practice and the project of a transnational network of European elites. Available as Open Access.

Storylistening

Narrative Evidence and Public Reasoning

Routledge Storylistening makes the case for the urgent need to take stories seriously in order to improve public reasoning. Dillon and Craig provide a theory and practice for gathering narrative evidence that will complement and strengthen, not distort, other forms of evidence, including that from science. Focusing on the cognitive and the collective, Dillon and Craig show how stories offer alternative points of view, create and cohere collective identities, function as narrative models, and play a crucial role in anticipation. They explore these four functions in areas of public reasoning where decisions are strongly influenced by contentious knowledge and powerful imaginings: climate change, artificial intelligence, the economy, and nuclear weapons and power. Vivid performative readings of stories from The Ballad of Tam-Lin to The Terminator demonstrate the insights that storylistening can bring and the ways it might be practised. The book provokes a reimagining of what a public humanities might look like, and shows how the structures and practices of public reasoning can evolve to better incorporate narrative evidence. Storylistening aims to create the conditions in which the important task of listening to stories is possible, expected, and becomes endemic. Taking the reader through complex ideas from different disciplines in ways that do not require any prior knowledge, this book is an essential read for policymakers, political scientists, students of literary studies, and anyone interested in the public humanities and the value, importance, and operation of narratives.

English Vocabulary in Use Pre-intermediate and Intermediate with Answers

Cambridge University Press Vocabulary in Use Pre-intermediate and Intermediate is a vocabulary book for intermediate learners of English, primarily designed as a self-study reference and practice book, but which can also be used for classroom work. In its style and format it is similar to its upper intermediate and advanced equivalent, English Vocabulary in Use. - 100 easy-to-use units: over 2,500 vocabulary items in a wide range of topic areas are presented, contextualise and explained and explained on left-hand pages with a variety of follow-up activities on right-hand pages. - Helps to build on and expand existing vocabulary. - Suggests tips and techniques for good learning habits. - Designed to be flexible: can be used both for self-study and in class. - Provides a comprehensive key with not only answers to the exercises but also more comments on how the language is used. - Includes a detailed index with phonetic transcriptions.

The Government of No One

The Theory and Practice of Anarchism

Penguin UK A magisterial study of the history and theory of one of the most controversial political movements Anarchism routinely gets a bad press. It's usually seen as meaning chaos and disorder -- or even nothing at all. And yet, from Occupy Wall Street to Pussy Riot, Noam Chomsky to David Graeber, this philosophical and political movement is as relevant as ever. Contrary to popular perception, different strands of anarchism -- from individualism to collectivism -- do follow certain structures and a shared sense of purpose: a belief in freedom and working towards collective good without the interference of the state. In this masterful, sympathetic account, political theorist Ruth Kinna traces the tumultuous history of anarchism, starting with thinkers and activists such as Peter Kropotkin and Emma Goldman and through key events like the Paris Commune and the Haymarket affair. Skilfully introducing us to the nuanced theories of anarchist groups from Russia to Japan to the United States, The Government of No One reveals what makes a supposedly chaotic movement particularly adaptable and effective over centuries -- and what we can learn from it.

New Romantic Cyborgs

Romanticism, Information Technology, and the End of the Machine

MIT Press An account of the complex relationship between technology and romanticism that links nineteenth-century monsters, automata, and mesmerism with twenty-first-century technology's magic devices and romantic cyborgs. Romanticism and technology are widely assumed to be opposed to each other. Romanticism—understood as a reaction against rationalism and objectivity—is perhaps the last thing users and developers of information and communication technology (ICT) think about when they engage with computer programs and electronic devices. And yet, as Mark Coeckelbergh argues in this book, this way of thinking about technology is itself shaped by romanticism and obscures a better and deeper understanding of our relationship to technology. Coeckelbergh describes the complex relationship between technology and romanticism that links nineteenth-century monsters, automata, and mesmerism with twenty-first-century technology's magic devices and romantic cyborgs. Coeckelbergh argues that current uses of ICT can be interpreted as attempting a marriage of Enlightenment rationalism and romanticism. He describes the "romantic dialectic," when this new kind of material romanticism, particularly in the form of the cyborg as romantic figure, seems to turn into its opposite. He shows that both material romanticism and the objections to it are still part of modern thinking, and part of the romantic dialectic. Reflecting on what he calls "the end of the machine," Coeckelbergh argues that to achieve a more profound critique of contemporary technologies and culture, we need to explore not only different ways of thinking but also different technologies—and that to accomplish the former we require the latter.

English Phrasal Verbs in Use: Advanced

CAMBRIDGE University Press This reference and practice book contains 60 attractive two-page units featuring approximately 1,000 phrasal verbs. This new level of English Phrasal Verbs in Use is specifically designed for advanced level students looking to improve their knowledge of this often difficult area of the English language. The book includes many phrasal verbs useful to students preparing for the Cambridge CAE, CPE and IELTS examinations.

English Vocabulary in Use Upper-Intermediate Book with Answers

Vocabulary Reference and Practice

Cambridge University Press The words you need to communicate with confidence. Vocabulary explanations and practice for upper-intermediate level (B2) learners of English. Perfect for both self-study and classroom activities. Quickly expand your vocabulary with over 100 units of easy to understand explanations and practice exercises. Be confident about what you are learning, thanks to Cambridge research into how English is really spoken and written, and get better at studying by yourself, with units on learning vocabulary, personalised practice and an easy to use answer key.

Anarchist Seeds Beneath the Snow

Left-libertarian Thought and British Writers from William Morris to Colin Ward

Liverpool University Press From William Morris to Oscar Wilde to George Orwell left-libertarian thought has long been an important but neglected part of British cultural and political history. This work seeks to recover that indigenous anarchist tradition. It argues that a recovered anarchist tradition could be a touchstone for contemporary political radicals.

Illusion of Consent

Engaging with Carole Pateman

Penn State Press "A collection of essays that discuss the writings of Carole Pateman, with emphasis on her theories of democracy and feminism"--Provided by publisher.

Health of People, Places and Planet

Reflections based on Tony McMichael's four decades of contribution to epidemiological understanding

ANU Press This book has three main goals. The first is to celebrate the work of a great public health figure, the late A.J. (Tony) McMichael (1942–2014). The second is to position contemporary public health issues in an interdisciplinary context and in ways that highlight the interdependency between the environment, human institutions and behaviours; a broad approach championed by Tony. The third is to encourage emerging and future public health leaders to advocate for policies and cultural change to sustain and improve human health, from a foundation of objective scholarship. The book's foreword and 38 chapters were written by people who were inspired by Tony; many of whom worked with him at some point in the last 40 years. Its structure reflects five major public health domains, each of which Tony made major contributions to in an extremely productive academic life: occupational health and safety; environmental and social epidemiology; nutrition and food systems; climate change and health; and ecosystem change and infectious disease. The final section, 'Transformation', is dedicated to Tony's desire for public health scientists to propose adaptive and mitigating solutions to the problems they were observing. Each section contains at least one key publication involving Tony. There is also a selection of artworks from an exhibition which formed part of the conference held to honour Tony at The Australian National University in 2012. This conference formed the first part of Tony's festschrift, completed by this book.

The Soul of Russia

Wentworth Press This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Fundamental Rights Protection Online

The Future Regulation of Intermediaries

Edward Elgar Publishing Fundamental Rights Protection Online presents an in-depth analysis of national, supranational and international attempts at online speech regulation, illustrating how the law has been unsettled on how to treat intermediaries.

The Coombs

A House of Memories

ANU E Press The Coombs Building at The Australian National University is a Canberra icon. Named after one of Australia's greatest administrators and public intellectuals—'Nugget' Herbert Cole Coombs—for more than forty years the building has housed two of the University's four foundational Schools: the Research School of Pacific and Asian Studies and the Research School of Social Sciences. This volume of recollections is about the former. It looks at life in the building through the prism of personal experience and happenstance. Part memoir, part biography, and part celebration, this book is about the people of Coombs, past and present. Through evocative and lucid reflections, present and former denizens of the building share their passions and predilections, quietly savour their accomplishments and recall the failings and foibles of the past with a kindly tolerance.

The Ethical Algorithm

The Science of Socially Aware Algorithm Design

Oxford University Press, USA Over the course of a generation, algorithms have gone from mathematical abstractions to powerful mediators of daily life. Algorithms have made our lives more efficient, more entertaining, and, sometimes, better informed. At the same time, complex algorithms are increasingly violating the basic rights of individual citizens. Allegedly anonymized datasets routinely leak our most sensitive personal information; statistical models for everything from mortgages to college admissions reflect racial and gender bias. Meanwhile, users manipulate algorithms to "game" search engines, spam filters, online reviewing services, and navigation apps. Understanding and improving the science behind the algorithms that run our lives is rapidly becoming one of the most pressing issues of this century. Traditional fixes, such as laws, regulations and watchdog groups, have proven woefully inadequate. Reporting from the cutting edge of scientific research, The Ethical Algorithm offers a new approach: a set of principled solutions based on the emerging and exciting science of socially aware algorithm design. Michael Kearns and Aaron Roth explain how we can better embed human principles into machine code - without halting the advance of data-driven scientific exploration. Weaving together innovative research with stories of citizens, scientists, and activists on the front lines, The Ethical Algorithm offers a compelling vision for a future, one in which we can better protect humans from the unintended impacts of algorithms while continuing to inspire wondrous advances in technology.

The Retreat from Moscow

A Play About a Family

Anchor How well do we know the people we marry? Is it wrong to decide it's time to be honest? Is love enough to save a family? In The Retreat from Moscow, William Nicholson, the celebrated author of Shadowlands, tells the powerful story of a husband who decides to be truthful in his marriage, and of the wife and son whose lives will never be the same again. Edward and Alice have been married for thirty-three years. He is a teacher at a boys school, perfectly at home with his daily crossword and lately engrossed in reading about Napoleon's costly invasion of Moscow. She is an observant Catholic, exacting and opinionated, and has been collecting poems about lost love for a new anthology. Jamie, their diffident thirty-two year old son, is visiting for the weekend when Edward announces he has met another woman. With the coiled intensity of Tom Stoppard's The Real Thing and the embracing empathy of Edward Albee's best family dramas, The Retreat from Moscow shines a breathtakingly natural light on the fallout of a shattered marriage.

The Future Computed

Artificial Intelligence and Its Role in Society

Government Policy toward Open Source Software

Brookings Institution Press Can open source software—software that is usually available without charge and that individuals are free to modify—survive against the fierce competition of proprietary software, such as Microsoft Windows? Should the government intervene on its behalf? This book addresses a host of issues raised by the rapid growth of open source software, including government subsidies for research and development, government procurement policy, and patent and copyright policy. Contributors offer diverse perspectives on a phenomenon that has become a lightning rod for controversy in the field of information technology. Contributors include James Bessen (Research on Innovation), David S. Evans (National Economic Research Associates), Lawrence Lessig (Stanford University), Bradford L. Smith (Microsoft Corporation), and Robert W. Hahn (director, AEI-Brookings Joint Center).

Triumphs of Experience

Harvard University Press At a time when people are living into their tenth decade, the longest longitudinal study of human development ever undertaken offers welcome news for old age: our lives evolve in our later years and often become more fulfilling. Among the surprising findings: people who do well in old age did not necessarily do so well in midlife, and vice versa.

Valvular Heart Disease

Oxford University Press Highly-illustrated and in line with current European guidelines, this handbook covers all aspects of the management of patients with valvular heart disease, providing clear advice on pathophysiology, diagnosis, investigation and treatment, including in special situations such as pregnancy or during non-cardiac surgery.

The Cambridge Grammar of the English Language

This grammar for the 21st century combines clear grammatical principles with non-technical explanations of all terms and concepts used.

London's Working-Class Youth and the Making of Post-Victorian Britain, 1958–1971

Springer Nature This book examines the emergence of modern working-class youth culture through the perspective of an urban history of post-war Britain, with a particular focus on the influence of young people and their culture on Britain's self-image as a country emerging from the constraints of its post-Victorian, imperial past. Each section of the book – Society, City, Pop, and Space – considers in detail the ways in which working-class youth culture corresponded with a fast-changing metropolitan and urban society in the years following the decline of the British Empire. Was teenage culture rooted in the urban experience and the transformation of working-class neighbourhoods? Did youth subcultures emerge simply as a reaction to Britain's changing racial demographic? To what extent did leisure venues and institutions function as laboratories for a developing British pop culture, which ultimately helped Britain re-establish its prominence on the world stage? These questions and more are answered in this book.

Program Synthesis

Program synthesis is the task of automatically finding a program in the underlying programming language that satisfies the user intent expressed in the form of some specification. Since the inception of artificial intelligence in the 1950s, this problem has been considered the holy grail of Computer Science. Despite inherent challenges in the problem such as ambiguity of user intent and a typically enormous search space of programs, the field of program synthesis has developed many different techniques that enable program synthesis in different real-life application domains. It is now used successfully in software engineering, biological discovery, compute-raided education, end-user programming, and data cleaning. In the last decade, several applications of synthesis in the field of programming by examples have been deployed in mass-market industrial products. This monograph is a general overview of the state-of-the-art approaches to program synthesis, its applications, and subfields. It discusses the general principles common to all modern synthesis approaches such as syntactic bias, oracle-guided inductive search, and optimization techniques. We then present a literature review covering the four most common state-of-the-art techniques in program synthesis: enumerative search, constraint solving, stochastic search, and deduction-based programming by examples. It concludes with a brief list of future horizons for the field.

Methods in prosody

A Romance language perspective

Language Science Press This book presents a collection of pioneering papers reflecting current methods in prosody research with a focus on Romance languages. The rapid expansion of the field of prosody research in the last decades has given rise to a proliferation of methods that has left little room for the critical assessment of these methods. The aim of this volume is to bridge this gap by embracing original contributions, in which experts in the field assess, reflect, and discuss different methods of data gathering and analysis. The book might thus be of interest to scholars and established researchers as well as to students and young academics who wish to explore the topic of prosody, an expanding and promising area of study.

English Collocation in Use. Per Le Scuole Superiori

Ernst Klett Sprachen GmbH Collocations are combinations of words which frequently appear together. Using them makes your English sound more natural. Presents and explains approximately 1,500 word combinations in typical contexts using tables, charts, short texts and dialogues.

Ministerial Code

Solar Dance

Harvard University Press Main description: In Modris Eksteins's hands, the interlocking stories of Vincent van Gogh and art dealer Otto Wacker reveal the origins of the fundamental uncertainty that is the hallmark of the modern era. Through the lens of Wacker's sensational 1932 trial in Berlin for selling fake Van Goghs, Eksteins offers a unique narrative of Weimar Germany, the rise of Hitler, and the replacement of nineteenth-century certitude with twentieth-century doubt. Berlin after the Great War was a magnet for art and transgression. Among those it attracted was Otto Wacker, a young gay dancer turned art impresario. His sale of thirty-three forged Van Goghs and the ensuing scandal gave Van Gogh's work unprecedented commercial value. It also called into question a world of defined values and standards that had already begun to erode during the war. Van Gogh emerged posthumously as a hero who rejected organized religion and other suspect sources of authority in favor of art. Self-pitying Germans saw in his biography a series of triumphs-over defeat, poverty, and meaninglessness-that spoke to them directly. Eksteins shows how the collapsing Weimar Republic that made Van Gogh famous and gave Wacker an opportunity for reinvention propelled a third misfit into the spotlight. Taking advantage of the void left by a gutted belief system, Hitler gained power by fashioning myths of mastery. Filled with characters who delight and frighten, Solar Dance merges cultural and political history to show how upheavals of the early twentieth century gave rise to a search for authenticity and purpose.

The Last Statues of Antiquity

Oxford University Press The Last Statues of Antiquity is the first comprehensive survey of Roman honorific statues in the public realm in Late Antiquity, and is drawn from a major research project and corresponding online database that collates all the available evidence for the 'statue habit' across the Roman Empire, from the late third century AD onwards. The volume examines where, how, and why statues were used, and why these important features of urban life began to declinein number before eventually disappearing. Adopting a detailed comparative approach, the collection explores variation between different regions (including the Near East), as well as individual cities (such asAphrodisias), and also the different kinds of honorand, from provincial governors to cultural heroes.

Open Networks, Closed Regimes

The Impact of the Internet on Authoritarian Rule

Carnegie Endowment As the Internet diffuses across the globe, many have come to believe that the technology poses an insurmountable threat to authoritarian rule. Grounded in the Internet's early libertarian culture and predicated on anecdotes pulled from diverse political climates, this conventional wisdom has informed the views of policymakers, business leaders, and media pundits alike. Yet few studies have sought to systematically analyze the exact ways in which Internet use may lay the basis for political change. In O pen Networks, Closed Regimes, the authors take a comprehensive look at how a broad range of societal and political actors in eight authoritarian and semi-authoritarian countries employ the Internet. Based on methodical assessment of evidence from these cases—China, Cuba, Singapore, Vietnam, Burma, the United Arab Emirates, Saudi Arabia, and Egypt—the study contends that the Internet is not necessarily a threat to authoritarian regimes.

The Uncommon Reader

Alan Bennett's classic story about the Queen

Faber & Faber Alan Bennett's classic story about Queen Elizabeth II What would happen if the Queen became a reader of taste and discernment rather than of Dick Francis? The answer is a perfect story. The Uncommon Reader is none other than HM the Queen who drifts accidentally into reading when her corgis stray into a mobile library parked at Buckingham Palace. She reads widely (JR Ackerley, Jean Genet, Ivy Compton Burnett and the classics) and intelligently. Her reading naturally changes her world view and her relationship with people like the oleaginous prime minister and his repellent advisers. She comes to question the prescribed order of the world and loses patience with much that she has to do. In short, her reading is subversive. The consequence is, of course, surprising, mildly shocking and very funny.

Welsh Quilts

This new, expanded edition of Welsh Quilts is an authoritative guide to the history and art of the quilt in Wales. Expert author Jen Jones has added many new, high quality colour images - some never seen before - and four patterns for practitioners to work from. Textile legend Kaffe Fassett has written a Foreword to the book

Defining Literary Criticism

Scholarship, Authority and the Possession of Literary Knowledge, 1880-2002

Springer Outlining the controversies that have surrounded the academic discipline of English Literature since its institutionalization in the late nineteenth century, this important book draws on a range of archival sources. It addresses issues that are central to the identity of academic English - how the subject came into existence, and what makes it a specialist discipline of knowledge - in a manner that illuminates many of the crises that have affected the development of modern English studies. Atherton also addresses contemporary arguments about the teaching of literary criticism, including an examination of the reforms to A-Level literature.

Junior Science Projects

Explains scientific theory and principles through projects and experiments for the serious young scientist, such as glow discharges, black light, Schlieren optics, and Echo collecting.

Maxie Briscoe

Werewolf

Amber Heat The name's Maxie Briscoe and I am a werewolf...That's right, Maxie's a real life, full-moon-loving, Halloween icon. It's hard for a girl like Maxie. To survive, she hides her true self and acts the part of a normal human, all the while discreetly indulging the Beast within her. Talk about walking a narrow ledge. And that's not even the worst part of her life. Sex is. Maxie can bench press a pick-up truck and that spells disaster in the bedroom. She can't have any real fun knowing she might accidentally crush a lover while in the throes. Kind of kills the mood. When a friend's murder shatters the careful existence Maxie has carved out for herself, she comes face to face with Damien and Noah, two of the hottest men she's ever laid eyes on. And it only stirs her Beast and turns her on more when she realizes they're hot for each other. They're also the first werewolves she's run across since her own conversion. The attraction between the three of them is instant, but complicated, and the sex...explosive. Too bad there's a killer out there with his sights set on her...

Jimmy Bluefeather

Graphic Arts Books Old Keb Wisting is somewhere around ninety-five years old (he lost count awhile ago) and in constant pain and thinks he wants to die. He also thinks he thinks too much. Part Norwegian and part Tlingit Native ("with some Filipino and Portuguese thrown in"), he's the last living canoe carver in the village of Jinkaat, in Southeast Alaska. When his grandson, James, a promising basketball player, ruins his leg in a logging accident and tells his grandpa that he has nothing left to live for, Old Keb comes alive and finishes his last canoe, with help from his grandson. Together (with a few friends and a crazy but likeable dog named Steve) they embark on a great canoe journey. Suddenly all of Old Keb's senses come into play, so clever and wise in how he reads the currents, tides and storms. Nobody can find him. He and the others paddle deep into wild Alaska, but mostly into the human heart, in a story of adventure, love, and reconciliation. With its rogue's gallery of colorful, endearing, small-town characters, this book stands as a wonderful blend of Mark Twain's THE ADVENTURES OF HUCKLEBERRY FINN and John Nichols's THE MILAGRO BEANFIELD WAR, with dashes of John Steinbeck thrown in. It

English Phrasal Verbs in Use Advanced Book with Answers

Vocabulary Reference and Practice

Cambridge University Press Improve your understanding of phrasal verbs in English. Explanations and practice of approximately 1,000 phrasal verbs, written for advanced-level (C1 to C2) learners of English. Perfect for both self-study and classroom activities. Learn phrasal verbs in context, with lots of different topics, including 'Lectures and seminars', 'Agreeing' and 'Social life'. Be confident about what you are learning, thanks to Cambridge research into how English is really spoken and written, and get better at studying by yourself, with study tips, follow-up tasks and an easy to use answer key.

Napoleon, CEO

6 Principles to Guide and Inspire Modern Leaders

Sterling Publishing (NY) The next in Alan Axelrod's engaging and popular CEO series spotlights a perfect subject: Napoleon, the brilliant military strategist who also laid the administrative and judicial foundations for much of Western Europe. Axelrod looks at this much-studied figure in a new way, exploring six areas that constitute the core of what made Napoleon a great leader: Audacity, Vision, Empathy, Strategy, Logistics, and Tactics. Within these areas Axelrod formulates approximately 60 lessons framed in military analogies, valuable for anyone who aspires to leadership, whether in the boardroom or the Oval Office.
