Ferrari Enzo Car Learn about Sports Automobile Named After Enzo Ferrari Independently Published The Enzo Ferrari (Type F140) is a mid-engine sports car manufactured by Italian automobile manufacturer Ferrari and named after the company's founder, Enzo Ferrari. It was developed in 2002 using Formula One technology, such as a carbon-fibre body, F1-style automated-shift manual transmission, and carbon fibre-reinforced silicon carbide (C/SiC) ceramic composite disc brakes, as well as technologies not allowed in F1, such as active aerodynamics. The Enzo Ferrari generates substantial amounts of downforce through its front underbody flaps, small adjustable rear spoiler and rear diffuser, which work in conjunction to produce 3,363 newtons (756 lbf) of downforce at 200 km/h (124 mph) and 7,602 newtons (1,709 lbf) of downforce at 299 km/h (186 mph), before decreasing to 5,738 N (1,290 lbf) at top speed. McLaren MP4/4 Owners' Workshop Manual An insight into the design, engineering and operation of the most successful F1 car ever built Haynes Publishing UK The McLaren MP4/4 is the iconic Honda V6 turbo-powered F1 car built by McLaren for the 1988 grand prix season, driven by Ayrton Senna and Alain Prost. Remarkably, the car won all but one race during 1988, and took McLaren's then-new recruit Senna to his first Drivers' World Championship after a season-long battle with team-mate Prost. McLaren achieved an astonishing 10 one-two finishes with the car, and suffered only two car-related retirements during the season. The MP4/4 is still statistically the most dominant F1 car ever built. Ironically, the fact that McLaren was already an enormously successful and well-resourced team prior to 1988 has led to the assumption that producing another winning car in the form of the MP4/4 was simply business as usual. The truth is rather different, with many challenges along the way, mistakes to resolve and, as ever in motor racing, an element of luck, all playing a part in the MP4/4's extraordinary success. A wealth of previously unpublished archive material, including original technical drawings and team documentation, provides fascinating new insight into the design and build of the MP4/4. Produced with the full cooperation of McLaren, and unique access to a race-winning MP4/4 chassis, this manual tells for the first time the accurate story of the design, engineering and operation of one of F1's most iconic cars, featuring extensive and often candid input from the designers, engineers and drivers involved. The McLaren story: Brief history of McLaren prior to the MP4/4

and subsequent history to the present day. Design and build of the MP4/4: The full story of how a completely new car, along with a one-off Honda engine, were designed and built for the 1988 season. The MP4/4 in action: A race-by-race account of the MP4/4's performance in the 1988 World Championship. The anatomy of the MP4/4: Chassis, aerodynamics, suspension, steering, brakes, Honda engine, transmission, wheels and tyres, cockpit and electrics. The drivers: Insight from Alain Prost and test-driver Emanuele Pirro, plus a profile of Ayrton Senna with thoughts from his former teammates. Appendices: Specifications, race results and statistics and full chassis histories.

White Man's Problems Stories Open Road + Grove/Atlantic Short stories by an author who offers "shrewd, bitingly funny commentary on his own privileged class" (Time). In nine stories that move between nouveau riche Los Angeles and the working class East Coast, and strike a balance between comedy and catastrophe, Kevin Morris explores the vicissitudes of modern life. Whether looking for creative ways to let off steam after a day in court or enduring chaperone duties on a school field trip to the nation's capital, the heroes of White Man's Problems struggle to navigate the challenges that accompany marriage, family, success, failure, growing up, and getting older. "Kevin Morris is that rare writer who bridges the class divide, illuminating the lives of working class characters and affluent professionals with equal authenticity and insight. White Man's Problems is a revelatory collection that marks the arrival of striking new voice in American fiction." —Tom Perrotta "The echoes here are of a former generation of American writers—John Cheever, John Updike, Raymond Carver." —USA Today "Life undermines the pursuit of success and status in these rich, bewildering stories . . . A finely wrought and mordantly funny take on a modern predicament by a new writer with loads of talent." —Kirkus Reviews

Numbers, Specification Charts, Engine Data, Chassis, Technical Data, Options and Historical Information. & break;& break; Collectors, restorers and car buffs will love this key book from noted automotive authors, James Flammang and Mike Covello. The Car Show Nicolae Sfetcu This e-book details the most interesting and important characteristics of the automobiles, car maintenance, styling features, car body style, the standard classification of the cars, an history of the automobiles, introduction in the automotive industry, and the traffic code, rules and signs. An automobile, usually called a car (an old word for carriage) or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with "motor" referring to what is now usually called the engine. It has seats for the driver and, almost without exception, for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction, in New York City, over 10,000 tons of manure had to be removed from the streets daily. However, in 2006 the automobile is one of the primary sources of worldwide air pollution and cause of substantial noise and health effects. Lotus 98T Includes all Lotus-Renault F1 cars, 1983 to 1986 (93T, 94T, 95T, 97T & 98T) Haynes Publishing UK The Lotus 98T was the 1986-season, JPS-liveried F1 car driven by Ayrton Senna and team-mate Johnny Dumfries. Senna took eight podium positions, including two wins in the car, taking the fight to the superior McLarens and Williams. The 98T was one of the ultimate incarnations of an F1 car, powered by a Renault V6 turbo engine, which is conservatively estimated to have produced up to 1,300bhp at full boost. Senna was mighty to behold at the wheel of the 98T - he took pole position at eight of the season's 16 races, with victories in Spain and Detroit, famously crossing the line alongside Nigel Mansell in Spain, to win by 0.014s. This Manual, extensively illustrated with both period photographs and technical illustrations and photographs of a recently restored car, provides a fascinating insight into the design, evolution, operation, maintenance and restoration of the Lotus 98T. The Automotive Transmission Book Springer This book presents essential information on systems and interactions in automotive transmission technology and outlines the methodologies used to analyze and develop transmission concepts and designs. Functions of and interactions between components and subassemblies of transmissions are introduced, providing a basis for designing transmission systems and for determining their potentials and properties in vehicle-specific applications: passenger cars, trucks, buses, tractors and motorcycles. With these fundamentals the presentation provides universal resources for both state-of-the-art and future transmission technologies, including systems for electric and hybrid electric vehicles.
