**Foreign Policy, Domestic Politics and International Relations The case of Italy** [Routledge](#) This book offers a re-examination of foreign policy, in its relation with domestic politics and international relations (IR). Bringing together a vast body of literature from IR, foreign policy analysis, comparative politics and public policy, this book systematically reconceptualises foreign policy as a dialectic, produced by the interplay of context, strategy and discourse. It argues that foreign policy defies easy understandings and necessitates a complex framework of analysis, introducing the 'Strategic-Relational Model', as conceptualised in critical realism, for the first time to the field of foreign policy analysis. Combining a comprehensive investigation of the

last century of Italian foreign policy with an exploration of a key theoretical issue within the field of foreign policy analysis and IR, this book analyses key episodes within Italian foreign policy, including Italy's Cold War alliance politics, colonial interventions, fascist foreign policy and Italy's participation in the wars of Kosovo, Iraq and Afghanistan. It provides a comprehensive and up-to-date account of the long-term historical trajectory of Italian foreign policy, from the Liberal age to the 'Second Republic', including all four governments of Silvio Berlusconi. *Foreign Policy, Domestic Politics and International Relations* will be of interest to students and scholars of International Relations, Foreign Policy Analysis and Italian politics.

Through twelve case studies, the authors explore how security and international affairs think tanks in emerging powers collaborate with their policy makers to meet current and anticipate future foreign policy and security challenges. Overall, the book illustrates and analyzes how think tanks in a variety of political and economic contexts are able to contribute to their respective policy-making processes. Included in the discussions are the problems or successes that each respective nation's think tanks face, where they feel the emerging nation will be positioned, and where they are failing to meet the policy challenges they face. The book provides a comprehensive look at successful foreign policy formulation to serve as examples for other think tanks in similar political and economic conditions.

**Financial Statecraft The Role of Financial Markets in American Foreign Policy** As trade flows expanded and trade agreements proliferated after World War II, governments—most notably the United States—came increasingly to use their power over imports and exports to influence the behavior of other countries. But trade is not the only way in which nations interact economically. Over the past two decades, another form of economic exchange has risen to a level of vastly greater significance and political concern: the purchase and sale of financial assets across borders. Nearly \$2 trillion worth of currency now moves cross-border every day, roughly 90 percent of which is accounted for by financial flows unrelated to trade in goods and services—a stunning inversion of the figures in 1970. The time is ripe to ask fundamental questions about what Benn Steil and Robert Litan have coined as “financial statecraft,” or those aspects of economic statecraft directed at influencing international capital flows. How precisely has the American government practiced financial statecraft? How effective have these efforts been? And how can they be made more effective? The authors provide penetrating and incisive answers in this timely and stimulating book. **Reading and Writing for Civic Literacy The Critical Citizen's Guide to Argumentative Rhetoric** *Routledge* This brief edition of a groundbreaking textbook addresses the need for college students to develop critical reading, writing, and thinking skills for self-defense in the contentious arena of American civic rhetoric. Designed for first-year or more advanced composition and

critical thinking courses, it is one-third shorter than the original edition, more affordable for students, and easier for teachers to cover in a semester or quarter. It incorporates up-to-date new readings and analysis of controversies like the growing inequality of wealth in America and the debates in the 2008 presidential campaign, expressed in opposing viewpoints from the political left and right. Exercises help students understand the ideological positions and rhetorical patterns that underlie such opposing views. Widely debated issues of whether objectivity is possible and whether there is a liberal or conservative bias in news and entertainment media, as well as in education itself, are foregrounded as topics for rhetorical analysis.

**Presentation Outlines and Reading List National Security Seminar: Outlines and Reading Lists Russian Nationalism Since 1856 Ideology and the Making of Foreign Policy** Rowman & Littlefield This thoughtful book describes the range of nationalist ideas that have taken root in Russia since 1856. Drawing on a wide range of archival documents and unparalleled interview material from the post-Soviet period, Tuminez analyzes two cases\_Russian panslavism in 1856-1878 and great power nationalism in 1905-1914\_when aggressive nationalist ideas clearly influenced Russian foreign policy and contributed to decisions to go to war. Yet not all forms of nationalism have been malevolent, and the author assesses competing nationalist ideologies in the post-Soviet period to clarify the conditions under which a particularly belligerent nationalism could flourish and influence Russian international behavior.
