PRACTICAL BOAT OWNER'S SAILING AROUND THE UK AND IRELAND

A&C Black This new book, based on a highly successful series of articles in Practical Boat Owner magazine, is a detailed practical guide to sailing around the UK - all by means of day sails. Roger Oliver, a passionate sailor, explains his in-depth passage planning, boat preparations, weather checks and log-keeping, as well as his choice of routes, detailed navigation, sail trim tips and on-passage maintenance, all for the benefit of sailors who have a yen to follow in his footsteps. Packed with a wealth of practical tips on seamanship, anchoring in high winds, coping with big seas, problem-solving, harnessing the tide, sailing short-handed and living aboard for extended cruising, this book will be a godsend to the many thousands of sailors who enjoy coastal cruising and who will discover (as did Roger) that it is perfectly possible to cruise around the whole of the UK in a series of day sails. With this book to hand, and inspired by Roger's detailed route maps and spectacular photographs, anyone can experience the thrill and enjoyment of sailing around the beautiful and varied UK coast from any starting point.

GEOGRAPHICAL TARGETING FOR POVERTY ALLEVIATION

METHODOLOGY AND APPLICATIONS

World Bank Publications .."in many developing countries, there are large differences in economic conditions and the standard of living between regions, and even between communities within the same region. In many countries, poverty has a clear geographic dimension, since the poor are often concentrated in pockets of poverty. Therefore, the design of poverty alleviation policies must also have a significant spatial component." Although development projects are carefully designed and meticulously evaluated for cost effectiveness and benefits, too many of them are not sufficiently targeted geographically. The growing availability and use of spatial data, organized in a computer system such as a geographical information system (GIS), makes it more feasible to analyze the impact of projects in specific locales and to achieve more effective targeting. 'Geographical Targeting for Poverty Alleviation' introduces the basic concepts of a GIS. It also demonstrates how to organize geographic and nongeographic data. In addition, it presents different methods for using the data of the Household Income and Expenditure Survey, together with other surveys and the population census, to provide estimates for the standard of living and the incidence of poverty incidence in different geographical areas of a country. Ultimately, these estimates should be used to establish guidelines for targeting

poverty alleviation projects. This publication illustrates different GIS applications for identifying the project's target population, determining the project's spatial 'sphere of influence' or deciding where to locate public facilities. This publication is of interest to task managers, economists, development researchers, and geographers.
