## Time and Tide

Lucy Nash has just finished up her sophomore year of high school and is anticipating an uneventful summer at her rural Georgia home. . . that is, until a weird twist of fate and physics takes her on a trip back through time to the year 1975 with Cameron Hall, a boy her age whose own time is thirty years into her future. Cameron is hoping to stop a series of child disappearances, one of which deeply affected his family, and ends up teaming up with his accidental "passenger" to solve the crime. But despite their access to resources from the future, can two teenagers resolve a mystery that has remained a cold case for over sixty years. . . and what impact will their presence in the past have on their own lives - and their own futures?

## Planning for Power Advertising

## A User's Manual for Students and Practitioners

SAGE Publications India This book is a step-by-step guide to producing a sound foundation for advertising: one that will serve as the springboard to inspire powerful creative expression. Rich in cases from the evolving Indian context, Planning for Power Advertising offers an understanding of how strategic advertising is created. It takes the reader through cases and analyses of what worked or did not work in the marketplace. Anand Halve involves the reader throughout in exercises with Action Points at the end of most chapters—an approach that brings alive the concepts within, and helps readers discover the theory in practice. For advertising professionals, this is a manual to create a robust advertising brief. For students of advertising and marketing, Planning for Power Advertising is a simulation exercise from which they will learn how to apply the principles that will help them in their future careers. And for professionals in areas related to advertising—such as media, event management and PR—this book provides an insight into how the strategic underpinning of advertising is built.

## The White Tiger

## A Novel

Simon and Schuster SOON TO BE A MAJOR MOTION PICTURE The stunning Booker Prize-winning novel from the author of Amnesty and Selection Day that critics have likened to Richard Wright's Native Son, The White Tiger follows a darkly comic Bangalore driver through the poverty and corruption of modern India's caste society. "This is the authentic voice of the Third World, like you've never heard it before" (John Burdett, Bangkok 8). The white tiger of this novel is Balram Halwai, a poor Indian villager whose great ambition leads him to the zenith of Indian business culture, the world of the Bangalore entrepreneur. On the occasion of the president of China's impending trip to Bangalore, Balram writes a letter to him describing his transformation and his experience as driver and servant to a wealthy Indian family, which he thinks exemplifies the contradictions and complications of Indian society. Recalling The Death of Vishnu and Bangkok 8 in ambition, scope, The White Tiger is narrative genius with a mischief and personality all its own. Amoral, irreverent, deeply endearing, and utterly contemporary, this novel is an international publishing sensation—and a startling, provocative debut.

This text book provides answers to questions relating to the design, production and machining of cylinder components in a comprehensive technical analysis.

## Triple Cross

## A Triad of Chilling Suspense

Partridge Publishing 1. Raksha The Gokulpet police finds the body of a gangster named Bhadra in his own tempo van with multiple stab wounds. They initially believe it to be a gangland killing. Senior Inspector Jacob Janardhanan realizes that someone is misleading the investigators to protect the real killer. He delves deep into the life of the victim and realizes that everyone who Bhadra came across during his short unsavoury life has some reason to kill him. 2. Chikna The South Chennai cops receive an anonymous phone call that a car has crashed in the east-coast road. They find the body of a prosperous and popular businessman named Radheyshyam, who had relocated to Chennai twenty years ago. On gut instinct, Inspector Jacobs unearths a story that takes the readers down an incredible path of avarice, intrigue, and vicious cunning. 3. The Final Orbit The car of a reclusive Indore businessman Boopathi is found parked in a mango grove in Gwalior. Bhoopathi, an orphan who hailed from Gokulpet, has vanished in thin air. Senior Inspector Jacob Janardhanan finds the orphanage that brought up Bhoopathi. He then unravels the strange travails of a gifted young man through the murky waters of the Chennai underworld.

## Extraordinarily Ordinary

## A Collection of Short Stories

Partridge Publishing This collection of sixteen short stories is like music of varied, soft notes and chords which is soothing and pleasant and has a simple beauty. The delineation of characters and emotions has no sharp strokes or harsh lines. Ordinary people go about their daily business and yet manage to find narratives hidden in the hum-drum of a daily routine. These stories celebrate the ordinary fears, anxieties and joys of the common man. Trivial fragments are defined with clarity and its very placidity and reality startles the reader. They do not shake our sense of security or safety but in some reassuring way intensifies it. Fourteen of the sixteen stories are in the first person narrative and this adds a certain candour and poignancy to the emotions. The sagacious narrator foregrounds in his subtle understanding and wisdom a penetrating vision of compassion and sympathy. The style of narration has no philosophical complexities or psychoanalytical exploration. Avoiding frills or gimmicks, it uses implication and understatement to make its point. It is a must read for all those people who have had these simple experiences in the process of their lives pilgrimage. -Mrs. Kasturi Kanthan, Former Associate Professor, Department of English, Lady Sri Ram College for Women, University of Delhi

### Brand New Justice

Routledge Recently vilified as the prime dynamic driving home the breach between poor and rich nations, here the branding process is rehabilitated as a potential saviour of the economically underprivileged. Brand New Justice, now in a revised paperback edition, systematically analyses the success stories of the Top Thirteen nations, demonstrating that their wealth is based on the 'last mile' of the commercial process: buying raw materials and manufacturing cheaply in third world countries, these countries realise their lucrative profits by adding value through finishing, packaging and marketing and then selling the branded product on to the end-user at a hugely inflated price. The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process. Applying his observations on economic history and the development and impact of global marketing, Anholt presents a cogent plan for developing nations to benefit from globalization. So long the helpless victim of capitalist trading systems, he shows that they can cross the divide and graduate from supplier nation to producer nation. Branding native produce on a global scale, making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the 'last mile' benefits are key to this graduation and fundamental to forging a new global economic balance. Anholt argues with a forceful logic, but also backs his hypothesis with enticing glimpses of this process actually beginning to take place. Examining activities in India, Thailand, Russia and Africa among others, he shows the risks, challenges and pressures inherent in 'turning the tide', but above all he demonstrates the very real possibility of enlightened capitalism working as a force for good in global terms.

### New Frontiers of the Automobile Industry

### Exploring Geographies, Technology, and Institutional Challenges

Springer Nature Analysing developments in digital technologies and institutional changes, this book provides an overview of the current frenetic state of transformation within the global automobile industry. An ongoing transition brought about by the relocation of marketing, design and production centres to emerging economies, and experimentation with new mobility systems such as electrical, autonomous vehicles, this process poses the question as to how original equipment manufacturers (OEMs) and newcomers can remain competitive and ensure sustainability. With contributions from specialists in the automobile sector, this collection examines the shifts in power and geographical location occurring in the industry, and outlines the key role that public policy has in generating innovation in entrepreneurial states. Offering useful insights into the challenges facing emerging economies in their attempts to grow within the automobile industry, this book will provide valuable reading for those researching internationalization and emerging markets, business strategy and more specifically, the automotive industry.

### The Maruti Story

### How A Public Sector Company Put India On Wheels

Harper Collins An extraordinary and rare insight into how a few determined entrepreneurs created an icon... - C. K. PrahaladThe targets were stupendous and considered unachievable by almost everyone. Slightly over two years to find a suitable partner, finalize all legal documentation, get governmental approval to these agreements as well as to the investment proposals, build a factory, develop a supplier base to meet localization regulations, create a sales and service network, and develop and launch a peoples car that would sell 100,000 a year, in a sector where Indian expertise was limited. And to do this as a public sector company, having to follow all governmental systems and procedures, and having to please both its masters in the government and Suzuki Motor Corporation. However, the Maruti project succeeded, and in ways that were unimaginable in 1983. The car revolutionized the industry and put a country on wheels. Suddenly, ordinary middle-class men and women could aspire to own a reliable, economical and modern car, and the steep sales targets were easily met. Twenty-six years later, the company, now free of government controls and facing competition from the worlds major manufacturers who have entered the Indian market, still leads the way. Not only that, cars made by Maruti can be seen in all continents. By any yardstick, it is an incredible story, involving grit, management skill and entrepreneurship of a high order. R.C. Bhargava, who was at the helm of the company, and is currently its chairman, co-writing with senior journalist and author Seetha, shows how it was done in this riveting account of a landmark achievement.

## From Crisis to Communitisation

PM Press "Communitisation" means something quite straightforward: a revolution that starts to change social relations immediately. It would extend over years, decades probably, but from Day One it would begin to do away with wage-labour, profit, productivity, private property, classes, States, masculine domination, and more. There would be no "transition period" in the Marxist sense, no period when the "associated producers" continue furthering economic growth to create the industrial foundations of a new world. Communitisation means a creative insurrection that would bring about communism, not its preconditions. Thus stated, it sounds simple enough. The questions are what, how, and by whom. That is what this book is about. Communitisation is not the be-all and end-all that solves everything and proves wrong all past critical theory. The concept was born out of a specific period, and we can fully understand it by going back to how people personally and collectively experienced the crises of the 1960s and '70s. The notion is now developing in the maelstrom of a new crisis, deeper than the Depression of the 1930s, among other reasons because of its ecological dimension, a crisis that has the scope and magnitude of a crisis of civilisation. This is not a book that glorifies existing struggles as if their present accumulation were enough to result in revolution. Radical theory is meaningful if it addresses the question: How can proletarian resistance to exploitation and dispossession achieve more than aggravate the crisis? How can it reshape the world?

### The Tatas

### How a Family Built a Business and a Nation

Harper Collins | WINNER OF THE GAJA CAPITAL BUSINESS BOOK PRIZE 2019 | The nineteenth century was an exciting time of initiative and enterprise around the world. If John D. Rockefeller was creating unimagined wealth in the United States that he would put to the service of the nation, a Parsi family with humble roots was doing the same in India. In 1822, a boy was born in a priestly household in Gujarat's Navsari village. Young Nusserwanji knew early on that his destiny lay beyond his village and decided to head for Bombay to start a business - the first in his family to do so. He had neither higher education nor knowledge of business matters, just a burning passion to carve a path of his own. What Nusserwanji started as a cotton trading venture, his son Jamsetji, born in the same year as Rockefeller, grew into a multifaceted business, turning around sick textile mills, setting up an iron and steel company, envisioning a cutting-edge institute of higher learning, building a world-class hotel, and earning himself the title of the 'Bhishma Pitamah of Indian Industry'. Stewarded ably over the decades by Jamsetji's sons Dorabji and Ratanji, the charismatic and larger-than-life JRD, and thereafter the more business-like Ratan, the Tata group today is a 110-billion-dollar empire. The Tatas is their story. But it is more than just a history of the industrial house; it is an inspiring account of India in the making. It chronicles how each generation of the family invested not only in the expansion of its own business interests but also in nation building. Few know, for instance, that the first hydel power project in the world was conceived of and built by the Tatas. Nor that some radical labour concepts such as eight-hour work shifts were born in India, at the Tata mill in Nagpur. The Tata Cancer Research Centre, the Indian Institute of Science, the Tata Institute of Fundamental Research, as also the national carrier Air India - the family has a long, rich and unrivalled legacy. The Tatas is a tribute to a line of visionaries who have a special place in the hearts and minds of ordinary Indians. Written by seasoned journalist Girish Kuber, this is also the only book that tells the complete Tata story spanning almost two hundred years.

## The Cambridge International Handbook of Lean Production

### Diverging Theories and New Industries around the World

Cambridge University Press This handbook focuses on two sides of the lean production debate that rarely interact. On the one hand, management and industrial engineering scholars have presented a positive view of lean production as the epitome of efficiency and quality. On the other hand, sociology, industrial relations, and labor relations scholars focus on work speedups, management by stress, trade union positions, and self-exploitation in lean teams. The editors of this volume understand the merits of both views and present them accordingly, bridging the gaps among five disciplines and presenting the best of each perspective. Chapters by internationally acclaimed authors examine the positive, negative and neutral possible effects of lean, providing a global view of lean production while adjusting lean to the cultural and political contexts of different nation-states. As the first multi-lens view of lean production from academic and consultant perspectives, this volume charts a way forward in the world of work and management in our global economy.

## New Forms of Worker Organization

### The Syndicalist and Autonomist Restoration of Class Struggle Unionism

PM Press Bureaucratic labor unions are under assault. Most unions have surrendered the achievements of the mid-twentieth century, when the working class was a militant force for change throughout the world. Now trade unions seem incapable of defending, let alone advancing, workers' interests. As unions implode and weaken, workers are independently forming their own unions, drawing on the tradition of syndicalism and autonomism—a resurgence of self-directed action that augurs a new period of class struggle throughout the world. In Africa, Asia, the Americas, and Europe, workers are rejecting leaders and forming authentic class-struggle unions rooted in sabotage, direct action, and striking to achieve concrete gains. This is the first book to compile workers' struggles on a global basis, examining the formation and expansion of radical unions in the Global South and Global North. The tangible evidence marshaled in this book serves as a handbook for understanding the formidable obstacles and concrete opportunities for workers challenging neoliberal capitalism, even as the unions of the old decline and disappear. Contributors include Au Loong-Yu, Bai Ruixue, Shawn Hattingh, Piotr Bizyukov, Irina Olimpiewa, Genese M. Sodikoff, Aviva Chomsky, Dario Bursztyn, Gabriel Kuhn, Erik Forman, Steven Manicasteri, Arup Kumar Sen, Verity Burgmann, Ray Jureidini, Meredith Burgmann, and Jack Kirkpatrick.

## India and the Knowledge Economy

### Leveraging Strengths and Opportunities

World Bank Publications "In the global knowledge economy of the twenty-first century, India's development policy challenges will require it to use knowledge more effectively to raise the productivity of agriculture, industry, and services and reduce poverty. India has made tremendous strides in its economic and social development in the past two decades. Its impressive growth in recent years-8.2 percent in 2003-can be attributed to the far-reaching reforms embarked on in 1991 and to opening the economy to global competition. In addition, India can count on a number of strengths as it strives to transform itself into a knowledge-based economy-availability of skilled human capital, a democratic system, widespread use of English, macroeconomic stability, a dynamic private sector, institutions of a free market economy; a local market that is one of the largest in the world; a well-developed financial sector; and a broad and diversified science and technology infrastructure, and global niches in IT. But India can do more-much more-to leverage its strengths and grasp today's opportunities. India and the Knowledge Economy assesses India's progress in becoming a knowledge economy and suggests actions to strengthen the economic and institutional regime, develop educated and skilled workers, create an efficient innovation system, and build a dynamic information infrastructure. It highlights that to get the greatest benefits from the knowledge revolution, India will need to press on with the economic reform agenda that it put into motion a decade ago and continue to implement the various policy and institutional changes needed to accelerate growth. In so doing, it will be able to improve its international competitiveness and join the ranks of countries that are making a successful transition to the knowledge economy."

## Rotary Blood Pumps

### New Developments and Current Applications

Springer Science & Business Media Rotary blood pumps increasingly are being used in open heart surgery and in assisted circulation for patients with heart disease. These rotary devices include vortex (centrifugal) and axial pumps, which can be utilized in conditions where the use of conventional pulsatile pumps would entail problems of cost and size. Rapid progress is now being made in developing new devices for controlling blood flow within the heart and great vessels as well as extracorporeally for use in coronary and intensive care units and, in the future, for long-term use. This book provides information on the physiology of nonpulsatile circulation, the development of rotary pump engineering, and the clinical application of rotary blood pumps. It also presents an overview of future developments in this important field.

## Confession of a Buddhist Atheist

Random House Does Buddhism require faith? Can an atheist or agnostic follow the Buddha's teachings without believing in reincarnation or organized religion? This is one man's confession. In his classic *Buddhism Without Beliefs*, Stephen Batchelor offered a profound, secular approach to the teachings of the Buddha that struck an emotional chord with Western readers. Now, with the same brilliance and boldness of thought, he paints a groundbreaking portrait of the historical Buddha—told from the author's unique perspective as a former Buddhist monk and modern seeker. Drawing from the original Pali Canon, the seminal collection of Buddhist discourses compiled after the Buddha's death by his followers, Batchelor shows us the Buddha as a flesh-and-blood man who looked at life in a radically new way. Batchelor also reveals the everyday challenges and doubts of his own devotional journey—from meeting the Dalai Lama in India, to training as a Zen monk in Korea, to finding his path as a lay teacher of Buddhism living in France. Both controversial and deeply personal, Stephen Batchelor's refreshingly doctrine-free, life-informed account is essential reading for anyone interested in Buddhism.

## Theatre and Politics

Bloomsbury Publishing What happens to politics when it takes the form of theatre? How has theatre both exploited and undermined politics both in society and on the stage? *Theatre & Politics* explores the complex relationship between theatre and politics, questioning some of the assumptions that often arise when they are brought together. Challenging ideas about 'entertainment' and 'communication', the book draws on a broad range of key writing from Plato to Rancière, and theatrical examples from Shakespeare and his adaptors through Peter Handke to Debbie Tucker Green.

## Kaizen (Ky'zen), the Key to Japan's Competitive Success

New York : Random House Business Division Kaizen means gradual, unending improvement, doing "little things" better; setting --and achieving --ever higher standards. It is Kaizen, says Masaaki Imai, that is the simple truth behind Japan's economic "miracle" and the real reason the Japanese have become the masters of "flexible manufacturing" technology -- the ability to adapt manufacturing processes to changing customer and market requirements, and do it fast ... For the first time, Western managers have a comprehensive handbook of 16 Kaizen management practices they can put to work. Using more than 100 examples of Kaizen in action, 15 corporate case studies, and 50 charts and graphs, Mr. Imai examines step by step all the roles Kaizen plays in. --inside cover

## Moving Out of Poverty

## Rising from the Ashes of Conflict

World Bank Publications There is no peace with hunger. Only promises and promises and no fulfillment. If there is no job, there is no peace. If there is nothing to cook in the pot, there is no peace. - Oscar, a 57-year-old man, El Gorri n, Colombia They want to construct their houses near the road, and they cannot do that if they do not have peace with their enemies. So peace and the road have developed a symbiotic relation. One cannot live without the other. . . . - A community leader from a conflict-affected community on the island of Mindanao, Philippines Most conflict studies focus on the national level, but this volume focuses on the community level. It explores how communities experience and recover from violent conflict, and the surprising opportunities that can emerge for poor people to move out of poverty in these harsh contexts. 'Rising from the Ashes of Conflict' reveals how poor people's mobility is shaped by local democracy, people's associations, aid strategies, and the local economic environment in over 100 communities in seven conflict-affected countries, including Afghanistan. The findings suggest the need to rethink postconflict development assistance. This is the fourth volume in a series derived from the Moving Out of Poverty study, which explores mobility from the perspectives of poor people in more than 500 communities across 15 countries.

## The Automobile

## An Indian Love Affair

Penguin Random House India Private Limited For thousands of people, the automobile has been, and yet remains an object of pleasure, pride, status, sports, excitement, emotion and passion. The automobile has been the most important invention of the twentieth century. Not only has it given the hoi polloi freedom, mobility and liberty, it has changed our lifestyle, the way we live and interact, the way we work, the kind of jobs that we do, and has led to an evolution of our cultures. It has changed the cities, the countryside, the way they are conceived, designed and constructed, the way our houses and apartment blocks are configured, as well as the technology involved therein. Post-independence, the automobile played a very important role in India's industrial growth, as well as a hero in many Bollywood movies. The automobile is yet transforming India, as it connects the remotest corners of our vast nation, providing mobility, freedom and jobs to millions. It has acted as an emancipator for women in many parts of the nation, allowing them to go to school and university, commute to work and to the marketplace. With the help of this book, Gautam Sen has traced the history of the automobile in India and the way it has shaped the economy and society here. He has also talked about the evolution of races and bikes in Asia. The riveting story told in the most fascinating anecdotal tone, this book is filled with well-researched facts and details for the lovers of automobiles. The pictures in the book, too, are gorgeous and rare.

## Automotive Paints and Coatings

John Wiley & Sons Now in its second edition and still the only book of its kind, this is an authoritative treatment of all stages of the coating process -- from body materials, paint shop design, and pre-treatment, through primer surfacers and top coats. New topics of interest covered are color control, specification and testing of coatings, as well as quality and supply concepts, while valuable information on capital and legislation aspects is given. Invaluable for engineers in the automotive and paints and coatings industry as well as for students in the field.
