**They say there are five stages of grief: denial, anger, bargaining, depression, and acceptance. Not everyone will grieve in this order, nor will everyone go through every stage. It's during the stage of denial when Alex Hart meets Andrew Foster. He takes her one-step closer to acceptance: the stage when new, meaningful relationships are formed. The stage when the realization occurs that this is now the new state of normal. Just when Alex thinks she is on her way to healing, she enters the bargaining phase. That's the phase where you wonder what you could have done differently. You wonder "what if?" Specifically, what if the ones you loved hadn't left you? Leaving...this is what makes heading off to war so difficult and frightening for Alex. She knows all too well what it's like to be the one on the losing end of life, which is why she's made it her personal mission in life to save as many lives as possible. The extreme high she gets from treating trauma victims turns into Alex's own form of therapy, or so she thinks. When faced with her world being turned upside down, Alex may just find that her true therapy is in the one who has always saved her. Skipping Stones is a stand alone novel.**

## **CLINICAL PATHWAYS IN STROKE REHABILITATION**

---

---

### **EVIDENCE-BASED CLINICAL PRACTICE RECOMMENDATIONS**

---

[Springer Nature](#) **This open access book focuses on practical clinical problems that are frequently encountered in stroke rehabilitation. Consequences of diseases, e.g. impairments and activity limitations, are addressed in rehabilitation with the overall goal to reduce disability and promote participation. Based on the available best external evidence, clinical pathways are described for stroke rehabilitation bridging the gap between clinical evidence and clinical decision-making. The clinical pathways answer the questions which rehabilitation treatment options are beneficial to overcome specific impairment constellations and activity limitations and are well acceptable to stroke survivors, as well as when and in which settings to provide rehabilitation over the course of recovery post stroke. Each chapter starts with a description of the clinical problem encountered. This is followed by a systematic, but concise review of the evidence (RCTs, systematic reviews and meta-analyses) that is relevant for clinical decision-making, and comments on assessment, therapy (training, technology, medication), and the use of technical aids as appropriate. Based on these summaries, clinical algorithms / pathways are provided and the main clinical-decision situations are portrayed. The book is invaluable for all neurorehabilitation team members, clinicians, nurses, and therapists in neurology, physical medicine and rehabilitation, and related fields. It is a World Federation for NeuroRehabilitation (WFNR) educational initiative, bridging the gap between the rapidly expanding clinical research in stroke rehabilitation and clinical practice across societies and continents. It can be used for both clinical decision-making for individuals and as well as clinical background knowledge for stroke rehabilitation service development initiatives.**

## THAT YOU MIGHT BELIEVE - STUDY ON THE GOSPEL OF JOHN

---

Biblical Studies Press There are certain books of the Bible that just seem to stand out and the Gospel of John is surely one such book. It is frequently the first book of the Bible we encourage non-Christians to read in the hope that its message will lead them to faith in Christ. After all, that is the purpose of the book. See John 20:31. For Christians, the Gospel of John is a source of much truth about our Lord and the Gospel. But it is much more than that. It is an opportunity for us to follow Him as we read, and to identify with the disciples as their knowledge of Him continues to expand. It is our opportunity to get to know the heart of the Savior, and to fellowship with Him through His Word. If men of old found their hearts set on fire as they listened to Him teach in person (Luke 24:32), so we will find our hearts warmed as we seek to listen to Him through this Gospel. I challenge you to join me in making the Gospel of John the subject of your study. May God use it to help you see and serve Jesus Christ as the Lamb of God, who takes away the sin of the world (John 1:29).

BoD - Books on Demand "I want something to do." This remark being addressed to the world in general, no one in particular felt it their duty to reply; so I repeated it to the smaller world about me, received the following suggestions, and settled the matter by answering my own inquiry, as people are apt to do when very much in earnest. "Write a book," quoth the author of my being. "Don't know enough, sir. First live, then write." "Try teaching again," suggested my mother. "No thank you, ma'am, ten years of that is enough." "Take a husband like my Darby, and fulfill your

mission," said sister Joan, home on a visit. "Can't afford expensive luxuries, Mrs. Coobiddy." "Turn actress, and immortalize your name," said sister Vashti, striking an attitude. "I won't." "Go nurse the soldiers," said my young brother, Tom, panting for "the tented field." "I will!"

## **PRACTICAL TEACHING IN EMERGENCY MEDICINE**

---

John Wiley & Sons Emergency medicine attendings who wish to hone their teachingskills can find a number of books on educational strategies writtenby physicians from other disciplines. However, until thepublication of the first edition of this book, they did not haveaccess to a text written by emergency medicine physicians onmethods of teaching that are directly applicable to teaching EM.This book was compiled to meet that need. Following the introductory section, which provides importantbackground information, the book's contents are organizedinto 4 sections that correspond to the core needs and interests ofEM educators: Section 2 focuses on practical and ethicalconsiderations of teaching in the ED; Section 3 provides strategiesfor teaching specific groups of learners; Section 4 looks at theskills that are characteristic of the best EM educators; andSection 5 looks indepthly at specific teaching techniques andstrategies. Now more than ever this book addresses the needs of physicianeducators from all over the world. New chapters discuss lecturingto an international audience; using simulation as a teaching tool;how to make journal club work for you, and other topics that are ofbroad interest to medical educators in this field. In general, each chapter has been updated and reviewed to make surethe content was something that emergency physician educators coulduse in any country . The chapter contributors are widely regarded as leaders in thefield of emergency medicine education and faculty development.Authors were given free rein to develop their chapters and write intheir own style. They were asked to present their personal views onhow to successfully teach the art of emergency medicine, ratherthan review evidence-based guidelines regarding medical education.As a result, most of the chapters have few references. Thisfirst-person approach to a multi-authored textbook yields acompilation that varies in style from chapter to chapter andexposes the reader to a variety of communication techniques.

**INFLUENCES OF THE IEA CIVIC AND CITIZENSHIP EDUCATION STUDIES**

**PRACTICE, POLICY, AND RESEARCH ACROSS COUNTRIES AND REGIONS**

---

---

[Springer Nature](#) **This open access book identifies the multiple ways that IEA's studies of civic and citizenship education have contributed to national and international educational discourse, research, policymaking, and practice. The IEA International Civic and Citizenship Education Study (ICCS), first conducted in 2009, was followed by a second cycle in 2016. The project was linked to the earlier IEA Civic Education Study (CIVED 1999, 2000). IEA's ICCS remains the only large-scale international study dedicated to formal and informal civic and citizenship education in school. It continues to make substantial contributions to understanding the nature of the acquired civic knowledge, attitudes, and participatory skills. It also discusses in-depth how a wide range of countries prepare their young people for citizenship in changing political, social, and economic circumstances. The next cycle of ICCS is planned for 2022. In this book, more than 20 national representatives and international scholars from Europe, Latin America, Asia, and North America assess how the processes and findings of the 2009 and 2016 cycles of ICCS and CIVED 1999/2000 have been used to improve nations' understanding of their students' civic knowledge, beliefs, attitudes, current civic-related behaviors, and intentions for future participation in a comparative context. There are also chapters summarizing the secondary analysis of those studies' results indicating their usefulness for educational improvement and reflecting on policy issues. The analyses and reflections in this book provide timely insight into international educational discourse, policy, practice, and research in an area of education that is becoming increasingly important for many societies.**

---

### **VOLCANO CRISIS COMMUNICATION**

---

[Springer](#) **This open access book provides a comprehensive overview of volcanic crisis research, the goal being to establish ways of successfully applying volcanology in practice and to identify areas that need to be addressed for future progress. It shows how volcano crises are managed in practice, and helps to establish best practices. Consequently the book brings together authors from all over the globe who work with volcanoes, ranging from observatory volcanologists, disaster practitioners and government officials to NGO-based and government practitioners to address three key aspects of volcanic crises. First, the book explores the unique nature of volcanic hazards, which makes them a particularly challenging threat to forecast and manage, due in part to their varying spatial and temporal characteristics. Second, it presents lessons learned on how to best manage volcanic events based on a number of crises that have shaped our understanding of volcanic hazards and crises management. Third, it discusses the diverse and wide-ranging aspects of communication involved in crises, which merge old practices and**

new technologies to accommodate an increasingly challenging and globalised world. The information and insights presented here are essential to tapping established knowledge, moving towards more robust volcanic crises management, and understanding how the volcanic world is perceived from a range of standpoints and contexts around the globe.

## **THE ROBBERY OF NATURE**

---

### **CAPITALISM AND THE ECOLOGICAL RIFT**

---

[Monthly Review Press](#) **Bridges the gap between social and environmental critiques of capitalism** In the nineteenth century, Karl Marx, inspired by the German chemist Justus von Liebig, argued that capitalism's relation to its natural environment was that of a robbery system, leading to an irreparable rift in the metabolism between humanity and nature. In the twenty-first century, these classical insights into capitalism's degradation of the earth have become the basis of extraordinary advances in critical theory and practice associated with contemporary ecosocialism. In *The Robbery of Nature*, John Bellamy Foster and Brett Clark, working within this historical tradition, examine capitalism's plundering of nature via commodity production, and how it has led to the current anthropogenic rift in the Earth System. Departing from much previous scholarship, Foster and Clark adopt a materialist and dialectical approach, bridging the gap between social and environmental critiques of capitalism. The ecological crisis, they explain, extends beyond questions of traditional class struggle to a corporeal rift in the physical organization of living beings themselves, raising critical issues of social reproduction, racial capitalism, alienated speciesism, and ecological imperialism. No one, they conclude, following Marx, owns the earth. Instead we must maintain it for future generations and the innumerable, diverse inhabitants of the planet as part of a process of sustainable human development.

### **LANGUAGE AND NEOLIBERALISM**

---

[Routledge](#) **Language and Neoliberalism** examines the ways in which neoliberalism, or the ideology of market rule, finds expression in language. In this groundbreaking original study, Holborow shows at once the misleading character of ideological meaning and the underlying social reality from which that meaning emerges. In universities, it is now the norm to use terms like entrepreneurial and business partnerships. How have these terms become a core component of education and gained such force? Markets have become, metaphorically, a power in their own right. They now tell governments how to act and warn them against too much public spending. Post-crash, the capitalist market continues

to be crisis-prone, and in that context the neoliberal ideology remains contested. Free of jargon and assuming no specialist knowledge, this book will strike a chord internationally by showing how neoliberal ideology has, literally, gone global in language. Drawing on Vološinov and Bakhtin, Williams and Gramsci, and introducing concepts from Marxist political economy, Language and Neoliberalism is essential reading for all interested in the intersection of linguistics/applied linguistics and politics.
