MERCEDES-BENZ - Guide

Edizioni Savine " In view of the number of volumes that have been produced in recent years about Germany's most famous auto maker, it must seem presumptuous to add yet another to the stack. Being relatively thin, this one had to be different. It devotes itself to Mercedes-Benz cars and the most specific and personal aspects of their development, performance and maintenance, at the unavoidable sacrifice of portions of the long history of this great firm. The fascinating story of Mercedes racing has been told by George Monkhouse, Laurence Pomeroy Jr. and S. C. H. Davis, among others, while the fine successes of 1954 and 1955 are still familiar to most readers. I've chosen to concentrate on several Mercedes and Benz racing machines that were extremely interesting and productive yet remain virtually unknown today. At the other end of the performance scale the distinctive Mercedes diesels are covered completely..." (1959 - Karl E. Ludvigsen)

Mercedes-Benz W114 and W115

The Complete Story

The Crowood Press The W114 and W115 models were enormously successful for Mercedes-Benz, and their sales in nine years of production between 1967 and 1976 almost equalled the total of all Mercedes passenger models built in the 23 years between 1945 and the time of their introduction in 1968. There were many reasons for this success, but perhaps the most important was that Mercedes expanded the range to include a simply vast amount of variants including four-cylinder and six-cylinder petrol engines, four-cylinder diesels; saloons, coupes and long-wheelbase models. With around 200 photographs, this book features the story of the design and development of the W114 and W115 ranges. It gives full technical specifications, including paint and interior trim choices; includes a chapter on the special US variants; gives production tables and model type codes and explores the Experimental Safety Vehicles developed from these cars. Finally, there is a chapter on buying and owning a 114- or 115-series Mercedes.

It also looks at the closely related 1.9 litre W110 and 3.0 litre W112 models, with the vehicles sold in the German, US and UK markets covered in detail. From Letters to Hrabal

Serpents Tail In the Polish city of Gdansk, our narrator Pawel tells of the driving lessons he took in the early 1990s, shortly after the end of communism. As he struggles with the tiny Fiat's gearbox, causing chaos while stalled at a crossroads, Pawel entertains his instructor Miss Ciwle with stories of his grandparents before the war and of his father in the 1970s, centered on their ownership of Mercedes-Benz cars - the outings, the races, the crashes and the inevitable repairs. Based on fact and illustrated with personal photographs, these tales contrast the golden era of Poland's pre-war independence with the dismal communist years, and with the uncertain new chapter in the country's history that had only just begun when Pawel was learning to drive. Huelle creates a portrait of three generations amid life-changing historical events.

Mercedes-Benz Sport-Light Coupe

The Complete Story

The Crowood Press In the very beginning, the automotive industry was dominated by open-top vehicles whose body shapes were very much based on the horse-drawn carriage, there were open and closed carriages and then there was the Coupe. These were developed from the type of carriage known as the Berlin coach, which was designed as a classic vehicle for individual luxury travel and prestige. This type of carriage offered an intimate atmosphere focused exclusively on the passengers; it did not even have space for luggage, it simply exuded style, elegance and luxury in every way. This first volume of the Mercedes-Benz Coupe book addresses the journey from what was a functional sports car design to what has become the incomparable Mercedes-Benz 'Sports Coupe': its timeless body design has remained, even today both a dream car and a dream Coupe to anyone whom aspires to follow in the footsteps of the early individualists who chose style and elegance over practicality. With over 300 photographs and illustrations, this book includes: an overview of the early days of 'Sports-Car' design; the influences of aerodynamics on design evolution; early protagonists at Daimler-Benz and how they influenced design of the Coupe shape; how the Racing Coupe influenced what became the production Sport Coupe; the experimental and one-off prototypes, and finally the continuation of the Super Sport Light concept through the 'S-Class' range.

Mercedes-Benz Saloon Coupe

The Complete Story

The Crowood Press First produced in 1928, Mercedes-Benz Coupés became the embodiment of elegance and exclusivity on four wheels. Their design became an experience for all the senses, appealing to every emotion. Hans-Dieter Futschik, the designer responsible for many of the later Mercedes-Benz models, said of the Saloon Coupé: 'A shorter wheelbase compared with the saloons gives it different proportions that are almost sports car-like in character. The passenger compartment is set further back. This gives it a sportier look than a saloon. In addition, the greenhouse is smaller and more streamlined than the basic body. It looks like a small head set on a muscular body, exuding a powerful and more dynamic attitude... Everything radiates power, elegance and agility.' This complete guide includes an overview of early automotive history; pre-merger design from both Benz and Daimler; the historical protagonists and how they influenced the design; how design and fashion change vehicle shape; the continued development of Saloon Coupe design to suit every class and finally, the modern idea of the Coupe.

Mercedes-Benz's Marketing Strategy in Mexico

GRIN Verlag Seminar paper from the year 2014 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1.0, EGADE Business School, language: English, abstract: The automobile industry is famous for being ahead of the curve in most areas. Automotive companies cannot rely on a one-time announcement or word-of-mouth chatter to keep a steady stream to customers. These companies have to have well developed advertising strategies in their marketing processes, in order to sustain a profitable growth in all the markets they serve throughout the world. Mercedes-Benz (MB) is a German high-class automobile company. Its products stand for luxury, reliability and dependability. The company belongs to the multinational division of the German manufacturer Daimler AG and has its headquarters in Stuttgart, Baden-Württemberg, Germany. The company has 274,616 employees and gained a profit of 10,887 billion U.S. dollar with revenue of 147,257 billion U.S. dollars. Mexico is very important for the company's North American strategy, which can be proved by the fact that Mercedes-Benz produces its cars in Monterrey, Nuevo Leon, Mexico. According to the McKinsey Global Media Report 2013 Latin America provided the highest growth in expenditure for advertising, in 2012 the increase was 13.3 percent. The increasing investments of automotive companies are a reason for it - in 2011 the industry expanded its expenditures in advertising by 101 percent. A critical analysis of the MB's marketing strategy in Mexico is the purpose of this research paper. Since we are not able to cover all aspects of the marketing of MB due to the limitation of 10 to 15 pages for this paper, the study will be focusing on the following areas: sponsoring, social media, TV advertisements and magazine commercials. Thus, other areas of marketing like brand management or viral marketing will not be addressed. The products and services the company offers in Mexico will be mentioned. The marketing strategy of Mercedes-Benz México will be described and target groups will be defined. At the end of this paper we will state how MB can use its marketing in Mexico more efficiently in order to gain higher profits.

Mercedes Benz - How A Great Campaign Can Almost Kill A Company

GRIN Verlag Essay from the year 2009 in the subject Communications - Public Relations, Advertising, Marketing, Social Media, grade: A, Ohio University (E.W. Scripps School of Journalism), course: International and Crosscultural Advertising, language: English, abstract: What started as one of the biggest and most expensive campaigns in the German automobile industry, almost ended in a disaster for the company. The result was the biggest crisis, a German automobile company had ever faced. Mercedes-Benz is a high-class automobile company. Its products stand for luxury, reliability and dependability. With this car, Mercedes was approaching a new market segment and therefore new target audiences. A campaign, that fits the new car in the overall Mercedes image, was crucial. In May 1996 Mercedes Benz started its huge advertising campaign - almost one and a half years prior to the official product launch on October 18th 1997. More than 100 million Euro will this launching campaign cost the company. Despite that the campaign only ran in the European market, the Mercedes-Benz brand and this specific campaign caught international attention. Newspapers from all over the world accompanied the A-Class until its official launch. These newspapers were also there, when the crisis occurred, that almost harmed the company on a long-term basis. Right after the launch, the car, that was supposed to be innovative, reliable and safe, failed in the so called "moose-test." After almost two years of positive media coverage, a flood of criticism followed. Due to the high level of awareness for the car, the public was n
