SL R129 SERIES 1989 TO 2001

Veloce Publishing Ltd It's hard to believe, but the W129-series Mercedes-Benz SL was launched over 20 years ago. However, its timeless styling has kept it fresh and attractive in the eyes of a new generation of enthusiasts, as well as those returning to the car having owned one when they were still in the dealerships. A combination of superb original design and peerless engineering and build quality adds to the desirability of this series of classic German machines, and has ensured that many of these cars can still be seen in regular use today. Covering the SL's ever-changing specification, and its presence in many of the world's major markets is a huge task, but it's all presented here in definitive detail, along with stunning contemporary photography, in a volume that will readily grace any reference library shelf or connoisseur's coffee table. Two earlier books, also published by Veloce, and covering the W113 cars and the 107-series SL and SLC, act as perfect companions to this title, which takes the SL story up to 1989.

THE DEATH AND LIFE OF GREAT AMERICAN CITIES

Random House In this classic text, Jane Jacobs set out to produce an attack on current city planning and rebuilding and to introduce new principles by which these should be governed. The result is one of the most stimulating books on cities ever written. Throughout the post-war period, planners temperamentally unsympathetic to cities have been let loose on our urban environment. Inspired by the ideals of the Garden City or Le Corbusier's Radiant City, they have dreamt up ambitious projects based on self-contained neighbourhoods, super-blocks, rigid 'scientific' plans and endless acres of grass. Yet they seldom stop to look at what actually works on the ground. The real vitality of cities, argues Jacobs, lies in their diversity, architectural variety, teeming street life and human scale. It is only when we appreciate such fundamental realities that we can hope to create cities that are safe, interesting and economically viable, as well as places that people want to live in. 'Perhaps the most influential single work in the history of town planning... Jacobs has a powerful sense of narrative, a lively wit, a talent for surprise and the ability to touch the emotions as well as the mind' New York Times Book Review

BEHAVIORAL FINANCE: THE SECOND GENERATION

CFA Institute Research Foundation Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

SEEKING A ROLE

THE UNITED KINGDOM 1951–1970

OUP Oxford In this, the first of two self-standing volumes bringing The New Oxford History of England up to the present, Brian Harrison begins in 1951 with much of the empire intact and with Britain enjoying high prestige in Europe. The United Kingdom

could still then claim to be a great power, whose welfare state exemplified compromise between Soviet planning and the USA's free market. When the volume ends in 1970, no such claims carried conviction. The empire had gone, central planning was in trouble, and even the British political system had become controversial. In an unusually wide-ranging, yet impressively detailed volume, Harrison approaches the period from unfamiliar directions. He explains how British politicians in the 1950s and 1960s responded to this transition by pursuing successive roles for Britain: worldwide as champion of freedom, and in Europe as exemplar of parliamentary government, the multi-racial society, and economic planning. His main focus, though, rests not on the politicians but on the decisions the British people made largely for themselves: on their environment, social structure and attitudes, race relations, family patterns, economic framework, and cultural opportunities. By 1970 the consumer society had supplanted postwar austerity, the socialist vision was fading, and 'the sixties' (the theme of his penultimate chapter) had introduced new and even exotic themes and values. Having lost an empire, Britain was still resourcefully seeking a role: it had yet to find it.

DISCIPLINE AND PUNISH

THE BIRTH OF THE PRISON

Penguin UK 'Imaginative, illuminating and innovative' The New York Times Book Review The grisly spectacle of public executions and torture of centuries ago has been replaced by the penal system in western society - but has anything really changed? In his revolutionary work on control and power relations in our public institutions, Michel Foucault argues that the development of prisons, police organizations and legal hierarchies has merely changed the focus of domination from our bodies to our souls. Even schools, factories, barracks and hospitals, in which an individual's time is controlled hour by hour, are part of a disciplinary society. 'Foucault's genius is called forth into the eloquent clarity of his passions ... his best book' Washington Post

HOW THE WORLD CHANGED SOCIAL MEDIA

UCL Press How the World Changed Social Media is the first book in Why We Post, a book series that investigates the findings of anthropologists who each spent 15 months living in communities across the world. This book offers a comparative analysis summarising the results of the research and explores the impact of social media on politics and gender, education and commerce. What is the result of the increased emphasis on visual communication? Are we becoming more individual or more social? Why is public social media so conservative? Why does equality online fail to shift inequality offline? How did memes become the moral police of the internet? Supported by an introduction to the project's academic framework and theoretical terms that help to account for the findings, the book argues that the only way to appreciate and understand something as intimate and ubiquitous as social media is to be immersed in the lives of the people who post. Only then can we discover how people all around the world have already transformed social media in such unexpected ways and assess the consequences

FRENCH ROCOCO ÉBÉNISTERIE IN THE J. PAUL GETTY MUSEUM

Getty Publications The first comprehensive catalogue of the Getty Museum's significant collection of French Rococo ébénisterie furniture. This catalogue focuses on French ébénisterie furniture in the Rococo style dating from 1735 to 1760. These splendid objects directly reflect the tastes of the Museum's founder, J. Paul Getty, who started collecting in this area in 1938 and continued until his death in 1976. The Museum's collection is particularly rich in examples created by the most talented cabinet masters then active in Paris, including Bernard van Risenburgh II (after 1696-ca. 1766), Jacques Dubois (1694-1763), and Jean-François Oeben (1721-1763). Working for members of the French royal family and aristocracy, these craftsmen excelled at producing veneered and marquetry pieces of furniture (tables, cabinets, and chests of drawers) fashionable for their lavish surfaces, refined gilt-bronze mounts, and elaborate design. These objects were renowned throughout Europe at a time when Paris was considered the capital of good taste. The entry on each work comprises both a curatorial section, with description and commentary, and a conservation report, with construction diagrams. An introduction by Anne-Lise Desmas traces the collection's acquisition history, and two technical essays by Arlen

Heginbotham present methodologies and findings on the analysis of gilt-bronze mounts and lacquer. www.getty.edu/publications/rococo

ALFA ROMEO 155/156/147 COMPETITION TOURING CARS

THE DEVELOPMENT AND RACING HISTORY

Veloce Publishing Ltd After saving Alfa Romeo from oblivion in 1987, it took Fiat nearly five years to debut the first new Alfa produced under its control. This is the story of how the competition versions of the 155/156/147 family of cars were developed and subsequently raced to many championship titles and race wins. Alfa Romeo's 155 saloon was a comprehensively successful racing touring car that won the German and world-wide DTM Championship, and later ITC races. The model also took on the role of representing the company in national touring car championships throughout the world, most notably winning the British Touring Car Championship in 1994. The 156 was Alfa's successor to the 155 and was also raced with much success. This book follows the development and competition history of this model too, along with its sibling, the 147. Together, these models kept the Alfa Romeo name at the pinnacle of motor sport for many years, from 1992 to 2006, and will become future motorsport classics.
