If you're like many parents, you might ask family and friends for advice

when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

The Conservative Collection A Guide to History and Politics in Modern America "The Conservative Collection" reinforces fundamental holdings of the Right. A strong, free, and thriving America requires us to value our founding principles and apply them in a modern world. Yet constant assaults on the very philosophies that birthed American exceptionalism jeopardize our sustained superiority. It, therefore, falls upon Conservatives to reenergize, inform, and strengthen the citizenry with the truths and successes stemming from conservatism. We need a strong America, one which will continue to be the home of liberty and prosperity. Discussed

within "The Conservative Collection" are eleven areas of conservative concern: Conservative History, Individual Liberty, The Legislature, The Executive, The Judiciary, Economic Strength, Educational Strength, Military Strength, Personal Responsibility, International Leadership, and Moving America Forward. In our unique nation of states, built upon the pillars of liberty and opportunity, we are responsible for protecting the blessings of freedom and ensuring our future welfare; "The Conservative Collection" looks to aid others in achieving those most-noble duties. A series of short essays complete this work, divided between the book's eleven sections. Not only does "The Conservative Collection" focus significant attention toward government and politics but also on character development and individual maturity. All Americans (Conservative or otherwise) must be leaders in a turbulent world-something not accomplished without purpose and principle.
