---

---

## FORCES

---

A seventeen-volume compilation of selected AEF records gathered by Army historians during the interwar years. This collection in no way represents an exhaustive record of the Army's months in France, but it is certainly worthy of serious consideration and thoughtful review by students of military history and strategy and will serve as a useful jumping off point for any earnest scholarship on the war. --from Foreword by William A Stofft.

## TOWARD A FEMINIST THEORY OF THE STATE

---

Harvard University Press This book presents MacKinnon's powerful analysis of politics, sexuality, and the law from the perspective of women. Using the debate over Marxism and feminism as a point of departure, MacKinnon develops a theory of gender centered on sexual subordination and applies it to the state.

---

## FLAVOURS AND FRAGRANCES

---

## CHEMISTRY, BIOPROCESSING AND SUSTAINABILITY

---

Springer Science & Business Media This book is an introduction to the world of aroma chemicals, essential oils, fragrances and flavour compositions for the food, cosmetics and pharmaceutical industry. Present technology, the future use of resources and biotechnological approaches for the production of the respective chemical compounds are described. The book has an integrated and interdisciplinary approach on future industrial production and the issues related to this topic.

## SUSTAINABLE BUILDING FOR A CLEANER ENVIRONMENT

---

## SELECTED PAPERS FROM THE WORLD RENEWABLE ENERGY NETWORK'S MED GREEN FORUM 2017

---

Springer This book contains selected papers presented during the bi-annual World Renewable Energy Network's Med Green Forum aimed at the international community as well as Mediterranean countries. This forum highlights the importance of growing renewable energy applications in two main sectors: Electricity Generation and the Sustainable Building Sector. In-depth chapters highlight the most current research and technological breakthroughs, covering a broad range of renewable energy technologies and applications in all sectors - for electricity production, heating and cooling, agricultural applications, water desalination, industrial applications and for the transport sectors.

## SEXUAL HARASSMENT OF WORKING WOMEN

---

## A CASE OF SEX DISCRIMINATION

---

Yale University Press A comprehensive legal theory is needed to prevent the persistence of sexual harassment. Although requiring sexual favors as a quid pro quo for job retention or advancement clearly is unjust, the task of translating that obvious statement into legal theory is difficult. To do so, one must define sexual harassment and decide what the law's role in addressing harassment claims should be. In *Sexual Harassment of Working Women*, Catharine Mac-Kinnon attempts all of this and more. In making a strong case that sexual harassment is sex discrimination and that a legal remedy should be available for it, the book proposes a new standard for evaluating all practices claimed to be discriminatory on the basis of sex. Although MacKinnon's "inequality" theory is flawed and its implications are not considered sufficiently, her formulation of it makes the book a significant contribution to the literature of sex discrimination. MacKinnon calls upon the law to eliminate not only sex discrimination but also most instances of sexism from society. She uses traditional theories in an admittedly strident manner, and relies upon both traditional and radical-feminist sources. The results of her effort are mixed. The book is at times fresh and challenging, at times needlessly provocative. -- <https://www.jstor.org> (Sep. 30, 2016).

## A CENTURY OF ARTISTS BOOKS

---

ABRAMS Published to accompany the 1994 exhibition at The Museum of Modern Art, New York, this book constitutes the most extensive survey of modern illustrated books to be offered in many years. Work by artists from Pierre Bonnard to Barbara Kruger and writers from Guillaume Apollinaire to Susan Sontag. An important reference for collectors and connoisseurs. Includes notable works by Marc Chagall, Henri Matisse, and Pablo Picasso.

## HANDBOOK OF STRATEGIC ENVIRONMENTAL ASSESSMENT

---

Routledge This authoritative handbook surveys the full breadth and depth of SEA, bringing together a range of international perspectives and insights on the theoretical, methodological and institutional dimensions and practical issues of the field. It then subjects this conventional wisdom to a critical reappraisal, looks at the vast lessons of experience and offers new ideas and interpretations as to where the field is going. The volume is organized into six major sections, beginning with an introduction and overview of the development of the field and a framework for

evaluating SEA good practice. Part I comprises a review of SEA frameworks in leading countries (Australia, Canada, New Zealand and the USA), the European Union and developing regions (Africa, Asia, Latin America and Newly Independent States). Part II reviews SEA practice in several major sectors (energy, minerals, transport, water, development assistance and coastal zone management). Part III addresses the linkages between SEA and other comparable tools such as spatial planning and environmental management. Part IV probes key cross-cutting issues in SEA, including how to address cumulative and trans-boundary effects. Part V identifies ways and means of SEA process and capacity development, focusing on how to improve and upgrade the theory and practice of the field. Part VI examines the shift from conventional SEA towards more integrative approaches, drawing on experience and examples from a number of countries. Published with IAIA

## **OIL CROP GENOMICS**

---

[Springer Nature](#) Plants are an important source of fats and oils, which are essential for the human diet. In recent years, genomics of oil biosynthesis in plants have attracted great interest, especially in high oil-bearing plants, such as sesame, olive, sunflower, and palm. Considering that, genome sequencing projects of these plants have been undertaken with the help of advanced genomics tools such as next generation sequencing. Several genome sequencing projects of oil crops are in progress and many others are en route. In addition to genome information, advanced genomics approaches are discussed such as transcriptomics, genomics-assisted breeding, genome-wide association study (GWAS), genotyping by sequencing (GBS), and CRISPR. These have all improved our understanding of the oil biosynthesis mechanism and breeding strategies for oil production. There is, however, no book that covers the genomes and genomics of oil crops. For this reason, in this volume we collected the most recent knowledge of oil crop genomics for researchers who study oil crop genomes, genomics, biotechnology, pharmacology, and medicine. This book covers all genome-sequenced oil crops as well as the plants producing important oil metabolites. Throughout this book, the latest genomics developments and discoveries are highlighted as well as open problems and future challenges in oil crop genomics. In doing so, we have covered the state-of-the-art of developments and trends of oil crop genomics.

## **NATURAL PRODUCTS**

---

---

### **DRUG DISCOVERY AND THERAPEUTIC MEDICINE**

---

[Springer Science & Business Media](#) A fresh examination of the past successes of natural products as medicines and their new future from both conventional and new technologies. High-performance liquid chromatography profiling, combinatorial synthesis, genomics, proteomics, DNA shuffling, bioinformatics, and genetic manipulation all now make it possible to rapidly evaluate the activities of extracts as well as purified components derived from microbes, plants,

and marine organisms. The authors apply these methods to new natural product drug discoveries, to microbial diversity, to specific groups of products (Chinese herbal drugs, antitumor drugs from microbes and plants, terpenoids, and arsenic compounds), and to specific sources (the sea, rainforest, and endophytes). These new opportunities show how research and development trends in the pharmaceutical industry can advance to include both synthetic compounds and natural products, and how this paradigm shift can be more productive and efficacious.
