Not intended to serve as a comprehensive review of algebra, this workbook is instead geared toward the most essential algebra skills. Each section begins with a few pages of instructions for how to solve the equations followed by a few examples. These examples should serve as a useful guide until students are able to solve the problems independently. Answers to exercises are tabulated at the back of the book. This helps students develop confidence and ensures that students practice correct techniques, rather than practice making mistakes. The

Each chapter contains 10 example questions with full solutions, 10 quick response questions and 25 practice problems. The problems are designed to test the students' mastery of the material discussed in each chapter. This book is the Solutions Manual of the accompanying Student Workbook, "Fun Math Problem Solving For Elementary School." The Student Workbook contains all the material and practice problems, and answers to all practice problems. The Solutions Manual includes in-depth solutions to all of the quick response and practice problems. The problems in this book offer the student a chance to start developing problem solving techniques that will be useful not only in mathematics but also in everyday life. An online self-paced video course is available along with this book and its companion book, "Fun Math Problem Solving for Elementary School." In the over 13 hours of videos, Areteem instructors provide detailed (and fun!) explanations of example questions from each of the 8 chapters of the book.
