For cynical twenty-three-year-old August, moving to New York City is supposed to prove her right: that things like magic and cinematic love stories don't exist, and the only smart way to go through life is alone. She can't imagine how waiting tables at a 24-hour pancake diner and moving in with too many weird roommates could possibly change that. And there's certainly no chance of her subway commute being anything more than a daily trudge through boredom and electrical failures. But then, there's this gorgeous girl on the train. Jane. Dazzling, charming, mysterious, impossible Jane. Jane with her rough edges and swoopy hair and soft smile, showing up in a leather jacket to save August's day when she needed it most. August's subway crush becomes the best part of her day, but pretty soon, she discovers there's one big problem: Jane doesn't just look like an old school punk rocker. She's literally displaced in time from the 1970s, and August is going to have to use everything she tried to leave in her own past to help her. Maybe it's time to start believing in some things, after all. Casey McQuiston's *One Last Stop* is a magical, sexy, big-hearted romance where the impossible becomes possible as August does everything in her power to save the girl lost in time. With few exceptions, however, little critical attention has been directed to the most important of all Soviet genres: the production novel, or *proizvodstvennyi roman*. Such neglect is particularly true of production novels written in the transitional era between the late 1920's and the early 1930's. Such works provide an essential but still misunderstood clue to the Stalinist era and the formation of Soviet culture. Based on contemporary theory and new archival research, *Writers at Work* re-assesses the production novel and re-interprets its importance in the development of Stalinism. The author uses both well known and long forgotten examples of the production novel to

explore the essential role this unique genre played in the construction of Soviet culture. Works about Soviet building projects appeared almost immediately after the 1917 revolution, and the genre remained common until the demise of the Soviet Union. Called the "most common type of Stalinist novel by far," the production novel included industrial blockbusters with titles like *Cement*, *Hydrocentral*, and *Time, Forward!* that were guaranteed placement in the pantheon of Socialist Realism. Yet a closer study of the early construction novels reveals that even the most established examples of this Stalinist genre fail in significant ways to conform to totalitarian requirements. What is surprising, in fact, is the degree to which allegedly conformist works actually diverge from the model they purport to champion. Neither established representatives of the genre nor less traditional works fully meet expectations for Stalinist literature. This book explores the reasons for this generic oddity and re-evaluates traditional treatment of these most "typical" Soviet works. Such a re-evaluation is both necessary and timely. Past studies of Soviet literature have often pitted a dynamic, utopian, horizontal 1920's against the static, conservative, closed 1930's. Although such a dichotomy is attractive as conceptual shorthand, it obscures the real shape of early Soviet space, particularly in the important transitional years of the first and second Five-Year Plans. Early production novels often opposed, ignored, or actively rejected such a rigidly dichotomous scheme. Far from being uninspired and formulaic, the early production novels were actually fertile ground on which writers struggled to build a better world and find their own place in it. This imagined universe differed dramatically, of course, from the completed totalitarian project, but the complex example of Soviet production novels makes a revised picture of Socialist Realism essential. Princeton Alumni Weekly *princeton alumni weekly* Architectural Record Press Summary - Illinois Information Service Quoting God How Media Shape Ideas about Religion and Culture *Baylor University Press* Quoting God charts the many ways in which media reports religion news, how media uses the quoted word to describe lived faith, and how media itself influences--and is influenced by--religion in the public square. The volume intentionally brings together the work of academics, who study religion as a crucial factor in the construction of identity, and the work of professional journalists, who regularly report on religion in an age of instant and competitive news. This book clearly demonstrates that the relationship between media culture and spiritual culture is foundational and multi-directional; that the relationship between news values and religion in political life is influential; and that the relationship amongst modernity, belief, and journalism is pivotal.
