KEY=SPRINT - JORDON CARTER

Network World For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce. **The Builder's Guide to the Tech Galaxy 99 Practices to Scale Startups into Unicorn Companies** *John Wiley & Sons* Learn to scale your startup with a roadmap to the all-important part of the business lifecycle between launch and IPO In The Builder's Guide to the Tech Galaxy: 99 Practices to Scale Startups into Unicorn Companies, a team of accomplished investors, entrepreneurs, and marketers deliver a practical collection of concrete strategies for scaling a small startup into a lean and formidable tech competitor. By focusing on the four key building blocks of a successful company – alignment, team, functional excellence, and capital—this book distills the wisdom found in countless books, podcasts, and the authors' own extensive experience into a compact and accessible blueprint for success and growth. In the book, you'll find: Organizational charts, sample objectives and key results (OKRs), as well as guidance for divisions including technology and product management, marketing, sales, people, and service operations Tools and benchmarks for strategically aligning your company's divisions with one another, and with your organization's "North Star" Templates and tips to attract and retain a triple-A team with the right scale-up mindset Checklists to help you attract growth capital and negotiate term sheets Perfect for companies with two, ten, or one hundred employees, The Builder's Guide to the Tech Galaxy belongs on the bookshelves of founders, managers, entrepreneurs, and other business leaders exploring innovative and proven ways to scale their enterprise to new heights. **Consumers Guide to Cell Phones and Wireless Service Plans** *Gulf Professional Publishing* Consumers can be overwhelmed by the myriad wireless options available. This book outlines the six steps of shopping for a wireless service. It then provides a miniguide with reviews of the wireless carriers and options available. It is the only book that is both a comprehensive guide and a source for answers to all of the consumer's questions. **PC Mag** PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology. **Electronics Buying Guide The Survey of the Use of Tablet Computers by Academic & Special Libraries** *Primary Research Group Inc* This special 78-page report looks closely at how academic and special libraries are using tablet computers. It helps librarians and information technology personnel to answer such questions as: what type of libraries are using tablets? What are they using them for? Which library departments are benefiting most from tablet use? Which brands of tablet are most popular? What are buying plans for the future? What stock of tablets do libraries have and how fast do they plan to expand this stock? How have tablets affected their ebook acquisition plans? What kind of apps do they use or develop for their tablets? Do they loan out tablets to patrons? On what terms? How long can patrons borrow them? Have they had losses due to theft? What is their overall budget for tablets and app development? **Mobile Tech Report 2014 Technology news from 2013 and predictions and insights about 2014.** *Mindwarm Incorporated* If you read technology news, you'll notice it's not just a story of amazing new product introductions, or even that plus copycat product introductions. All the usual aspects of business are there: fierce competition, new contenders, old survivors, great ideas but business failures, mediocre ideas that somehow seem to succeed and prosper. As a reporter, commentator and blogger on mobile technology, I've collected what happened in the industry in 2013 and make predictions on what will and won't happen in 2014. You can read what did happen in the mobile technology in 2013. Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement. This way you can dive into any detail level you desire, read my news feed for the overview or follow the related web link to the longer article. History is moving so fast now that it is all recorded electronically, but I'm surprised no one else has collected it and presented it for consideration. Here is 2013 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed. It's often overlooked that the technology industry is an industry. By that I mean its main concerns are profit and growth. As consumers we love the new products and unique abilities we are gaining from technology, but it is a business akin to any other, trying to seduce us to pry money out of our wallets. So I cover the horse race aspect of the business, who's up, who's down. Is that changing? Is that likely to change? The longer implications of what the technology industry is doing are vast and social. We are moving to an always on, always connected society where we can communicate with someone instantly and find an answer to any question quickly. The entire database of human knowledge is now available in the palm of your hand whenever you desire it. Everything is there, the good, the bad, right and wrong, hate and love, music and noise. We are obsessed with technology, not in and of itself, but as a means to an end. Technology is the means to satisfy our curiosity or even our desire for self-expression. We are taking photos machine gun-style with our smartphones and choose the few to share. As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible. Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years. He gave some boring answer about Moore's Law, but the real answer is that computers are in their teenage years. They are growing and growing. They will not always do so. So too the technology industry is in a state of rapid change. I see the shift to smaller devices as a new paradigm, smashing some businesses and growing others into giants. Their stories are here in the news. In short here are predictions for what won't and will happen in 2014 for the mobile technology industry, breakdowns of marketshare figures on the horse race aspect of the business, chapters on Apple, Samsung, Google, Microsoft, Nokia, Blackberry, Amazon, Yahoo, news about social media giants Facebook, Twitter, Google+, LinkedIn, Foursquare, SnapChat and the carriers themselves Verizon, AT&T, Sprint andT-Mobile. You can also review my 2013 mobile predictions and see my track record on predictions. Finally there are some essays on how all this mobile tech is figuring into our lives. I've divided the news into the subjects it covers, but also put in the appendix all the news as it came out in chronological ordering. You can read the firehose of events in the appendix, or just read about one topic at a time in the earlier chapters. Table of Contents Preface Introduction Chapter 1: 2014 Predictions Chapter 2: Mobile Marketshare Chapter 3: Apple Chapter 4: Samsung Chapter 5: Google Chapter 6: Microsoft Chapter 7: Nokia Chapter 8: Blackberry Chapter 9: Amazon Chapter 10: Social Media Chapter 11: Yahoo Chapter 12: Carriers Chapter 13: 2013 Predictions Chapter 14: Essays Appendix **Electronics Buying Guide 2008** A consumer guide integrates shopping suggestions and handy user tips as it describes and rates dozens of digital electronic products, including cell phones, digital cameras, televisions, computers, and home theater products. **PC Mag** PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services.
