Freehand Fashion

Learn to sew the perfect wardrobe - no patterns required!

Pavilion Before appearing on the BBC's The Great British Sewing Bee, Chinelo Bally had never used a sewing pattern. She wowed the judges with her ability to create stylish, fitted garments using a freehand cutting method that was taught to her by an aunt. In Freehand Fashion, Chinelo lets us in to the secret of how she does it. Using a series of basic garment blocks, Chinelo explains how this innovative technique can be used to create a whole wardrobe of fashionable clothes that will fit every shape and size - with no patterns required. Based on a traditional Nigerian technique, Chinelo has developed her own freehand cutting method. The emphasis is on the individual's own body measurements, and getting the perfect fit. This is a surprisingly simple technique that anyone can learn. No fancy equipment is needed - just a sewing machine, measuring tape, chalk and of course a good pair of scissors. Using step-by-step illustrations, the book shows how to draft, cut and construct the five basic blocks that are used - either singly or in combination - to make every item of clothing in the wardrobe. Once you have your basic blocks, you are ready to tackle the projects - practical garments that are fashionable, modern, stylish and versatile. There are tops, skirts, day dresses and eveningwear. This is an exciting sewing technique that will be brand new to most people, even experienced dressmakers. There really are no limits - and the beauty of this technique is that it can be applied to any body shape.

Autonomous Driving Changes the Future

Springer Nature This book systematically discusses the development of autonomous driving, describing the related history, technological advances, infrastructure, social impacts, international competition, China's opportunities and

challenges, and possible future scenarios. This popular science book uses straightforward language and includes quotes from ancient Chinese poems to enhance the reading experience. The discussions are supplemented by theoretical elaborations, presented in tables and figures. The book is intended for auto fans, upper undergraduate and graduate students in the field of automotive engineering.

Computational Diffusion MRI

MICCAI Workshop, Shenzhen, China, October 2019

Springer Nature This volume gathers papers presented at the Workshop on Computational Diffusion MRI (CDMRI 2019), held under the auspices of the International Conference on Medical Image Computing and Computer Assisted Intervention (MICCAI), which took place in Shenzhen, China on October 17, 2019. This book presents the latest advances in the rapidly expanding field of diffusion MRI. It shares new perspectives on the latest research challenges for those currently working in the field, but also offers a valuable starting point for anyone interested in learning about computational techniques in diffusion MRI. The book includes rigorous mathematical derivations, a wealth of rich, full-colour visualisations and extensive clinically relevant results. As such, it will be of interest to researchers and practitioners in the fields of computer science, MRI physics and applied mathematics. Readers will find contributions covering a broad range of topics, from the mathematical foundations of the diffusion process and signal generation, to new computational methods and estimation techniques for the in vivo recovery of microstructural and connectivity features, as well as diffusion-relaxometry and frontline applications in research and clinical practice. This edition includes invited works from high-profile researchers with a specific focus on three new and important topics that are gaining momentum within the diffusion MRI community, including diffusion MRI signal acquisition and processing strategies, machine learning for diffusion MRI, and diffusion MRI outside the brain and clinical applications.

Imaging Non-traumatic Abdominal Emergencies in Pediatric Patients

Springer This book provides up-to-date, comprehensive, and accurate information on the diagnostic imaging of nontraumatic abdominal emergencies in pediatric patients. All of the most common neonatal and pediatric emergencies are covered, with separate discussion of diseases that occur more commonly in newborns and those typically encountered later in childhood. For each condition, the main signs observed using the various imaging techniques - X-ray, Ultrasonography, Computed Tomography, and Magnetic Resonance - are described and illustrated with the aid of a wealth of images. Attention is drawn to those features of particular relevance to differential diagnosis, and the prognostic value of diagnostic imaging is also explained. The final section addresses topics of special interest, including the acute onset of abdominal neoplasms, the problems associated with radiation protection in the emergency setting, and medicolegal issues and informed content. The book will be of value for all radiologists working in emergency settings in which pediatric patients (newborn and children accessing the emergency department) are regularly examined.

Here

Penguin UK Here is Richard McGuire's unique graphic novel based on the legendary 1989 comic strip of the same name. Richard McGuire's groundbreaking comic strip Here was published under Art Spiegelman's editorship at RAW in 1989. Built in six pages of interlocking panels, dated by year, it collapsed time and space to tell the story of the corner of a room - and its inhabitants - between the years 500,957,406,073 BC and 2033 AD. The strip remains one of the most influential and widely discussed contributions to the medium, and it has now been developed, expanded and reimagined by the artist into this full-length, full-colour graphic novel - a must for any fan of the genre. 'From now on, McGuire will be known as the author of the novel Here, because it's a work of literature and art unlike any seen or read before. A book like this comes along once a decade, if not a century' Chris Ware, Guardian 'Promises to leapfrog immediately to the front ranks of the graphic-novel genre' New York Times Richard McGuire is a regular contributor to the New Yorker magazine. He has written and illustrated both children's books and experimental comics. His work has appeared in The New York Times, McSweeney's, Le Monde and Libération. He has written and directed two omnibus feature films, designed and manufactured his own line of toys, and is also the founder and bass player of the band Liquid Liquid.

Raw Pain Max

Crossroad Press PLAY TIME Her name is Trudy McAllen. On stage she is Raw Pain Max, a whip-toting Amazon who captivates thrill-hungry audiences nightly at the Safe Sex Club. REAL TIME Her name was Elizabeth Bathory. Legend knows her as Countess Blood. In the Hungary of three centuries ago, she fell in thrall to a sorcery that promised eternal youth. All she had to do was slaughter hundreds of young virgins. TERROR TIME Trudy and Elizabeth ... in that twilight realm where pleasure fuses with pain, each in her own way is both mistress and slave. Now across the far-flung span of years, beyond the recognized boundaries of life and death, the women will meet. And in that encounter the most unearthly savagery of all will want domination ...

Autocar

Flying Blind

The 737 MAX Tragedy and the Fall of Boeing

Penguin UK 'A startling investigation of the corporate blunders behind the tragedies that claimed the lives of 346 passengers.' - The Times 'A compelling, deeply reported account written in crisp, controlled anger...an indictment not just of one of America's most celebrated companies, but of an entire era.' - Financial Times 'An authoritative, gripping and finely detailed narrative that charts the decline of one of the great American companies.' - New York Times Book Review ----- Discover the corporate scandal that transfixed the world, cost hundreds of innocent lives, and almost destroyed a global institution. Boeing is a century-old titan of industry, having played a role in the early days of commercial flight, Second World War bombing missions and even moon landings. Yet in 2018 and 2019, two crashes of the Boeing 737 MAX 8 killed 346 people. The crashes exposed a shocking pattern of malfeasance, leading to the biggest crisis in the company's history - and one of the costliest corporate scandals ever. How did things go so horribly wrong? Flying Blind is the definitive account of the disasters that shocked the world; a chilling, behind-the-scenes look at the corporate dysfunction which contributed to one of the worst tragedies in modern aviation. It's an exposé of a reckless culture where - in a race to beat the competition and reward top executives - Boeing skimped on testing, pressured employees to meet unrealistic deadlines and ultimately convinced regulators to put planes into the air without properly equipping them or their pilots for flight. From award-winning Bloomberg investigative journalist Peter Robison, this is the story of a business gone wildly off course. At once endlessly fascinating and deeply disturbing, it shows how the iconic company fell prey to a win-at-all-costs mentality, threatening an industry and sacrificing countless lives. ----- 'An urgent, compelling and richly reported story of how the almighty profit motive supplanted a culture of engineering excellence, and the avoidable calamity that has impacted all of us as a result.' - Brad Stone, author of Amazon Unbound and The Everything Store 'A story everyone - every consumer, every citizen, every worker in every industry - needs to read.' - Diana B. Henriques, NYT bestselling author of The Death of Trust and The Wizard of Lies: Bernie Madoff 'The astoundingly well reported and beautifully told story of the downfall of what was once a great American company. A must-read.' - Bethany McClean, author of All The Devils Are Here and The Smartest Guys In The Room

A SECRET SORROW

Harlequin Comics

Harlequin / SB Creative After her nightmarish recovery from a serious car accident, Faye gets horrible news from her doctor, and it hits her hard like a rock: she can't bear children. Things No One Will Tell Fat Girls

A Handbook for Unapologetic Living

Hachette UK Things No One Will Tell Fat Girls is a manifesto and call to arms for women of all sizes and ages. With smart and spirited eloquence, veteran blogger Jes Baker calls on women to be proud of their bodies, fight against fat-shaming, and embrace a body-positive worldview to change public perceptions and help women maintain mental health. With the same straightforward tone that catapulted her to national attention when she wrote a public letter addressing the sexist comments of Abercrombie & Fitch's CEO, Jes shares personal experiences along with in-depth research in a way that is approachable, digestible, and empowering. Featuring notable guest authors, Things No One Will Tell Fat Girls is an invitation for all women to reject fat prejudice, learn to love their bodies, and join the most progressive, and life-changing revolution there is: the movement to change the world by loving their bodies.

Press Summary - Illinois Information Service

Large Animal Internal Medicine - E-Book

Elsevier Health Sciences Large Animal Internal Medicine, 4th Edition features a problem-based approach with discussions of over 150 clinical signs. This is the first internal medicine reference that enables you to efficiently diagnose horses, cattle, sheep, and goats based on clinical observation and laboratory and diagnostic testing. With this user-friendly format, you can find essential information about specific diseases and reach a diagnosis by simply identifying the signs. A unique problem-based approach with discussions of over 150 clinical signs and manifestations helps you quickly reach a diagnosis based on observations and laboratory tests. Causes of Presenting Signs boxes provide easy access to complete lists of common, less common, and uncommon diseases associated with manifestations or signs of disease. Complete lists of diseases associated with a given lab abnormality in Causes of Abnormal Laboratory Values boxes help you easily interpret abnormalities in clinical chemistry, hematology, blood proteins, and clotting tests. An expert team of over 180 authors contributing information in their areas of expertise ensures you are using the most accurate and up-to-date information available. Color plates accompanying Diseases of the Eye and Diseases of the Alimentary Tract enable you to visually recognize the clinical appearance of ophthalmologic conditions and alimentary tract disorders for quick and easy diagnosis and treatment. Six all-new chapters provide in-depth coverage of diagnostic testing, critical care and fluid therapy, biosecurity and infection control, and genetic disorders.

Sew Chinelo

How to transform your wardrobe with sustainable style

Collins & Brown Minimise waste and maximise creativity with 14 stylish freehand dressmaking projects from Chinelo Bally. Making your own clothes is a sustainable, ethical and fun craft that is brought alive by bestselling author and designer Chinelo Bally. Using the freehand cutting method for which she has become so well known, Chinelo shows how to upcycle and make stunning new items from old garments as well as making clothes using interesting new

fabrics, without the need for sewing patterns. The book features eleven projects for stylish women's clothes and three projects for children's clothes. Learn to turn a man's shirt into a fashionable dress and old pair of jeans into a sassy tutu skirt. Other projects include a one-shoulder jumpsuit and Chinelo's signature collared top. Throughout the book, Chinelo encourages the reader to make clothes to suit their own style and achieve results that are beautifully distinctive - and a far cry from throwaway fast-fashion. Projects include: • Women's Clothes: 2nd Date Night Dress, Angled-overlay Pencil Skirt, Asymmetric Peplum Top, One-shoulder Jumpsuit, Shirt to Button-back Dress, Jeans to Sassy Tutu Skirt, Pencil Dress Refit, Signature Collared Top, Versatile Maxi Dress, Showstopping Maxi and Strapless Wrap Dress. • Children's Clothes: Child's Peekaboo-back Dress, Shirt to Child's Dress, Jeans to Child's Dress Packed with tips, techniques and inspiration, Sew Chinelo reveals the secrets to producing sustainable and wearable clothes with style, feminine glamour and a professional finish that fit perfectly every time.

Manufacturing Facilities Design and Material Handling

Pearson Educación This project-oriented facilities design and material handling reference explores the techniques and procedures for developing an efficient facility layout, and introduces some of the state-of-the-art tools involved, such as computer simulation. A "how-to," systematic, and methodical approach leads readers through the collection, analysis and development of information to produce a quality functional plant layout. Lean manufacturing; work cells and group technology; time standards; the concepts behind calculating machine and personnel requirements, balancing assembly lines, and leveling workloads in manufacturing cells; automatic identification and data collection; and ergonomics. For facilities planners, plant layout, and industrial engineer professionals who are involved in facilities planning and design.

The Lives of Lucian Freud: The Restless Years

1922-1968

Knopf The first biography of the epic life of one of the most important, enigmatic and private artists of the 20th century. Drawn from almost 40 years of conversations with the artist, letters and papers, it is a major work written by a well-known British art critic. Lucian Freud (1922-2011) is one of the most influential figurative painters of the 20th century. His paintings are in every major museum and many private collections here and abroad. William Feaver's daily calls from 1973 until Freud died in 2011, as well as interviews with family and friends were crucial sources for this book. Freud had ferocious energy, worked day and night but his circle was broad including not just other well-known artists but writers, bluebloods, royals in England and Europe, drag queens, fashion models gamblers, bookies and gangsters like the Kray twins. Fierce, rebellious, charismatic, extremely guarded about his life, he was witty, mischievous and a womanizer. This brilliantly researched book begins with the Freuds' life in Berlin, the rise of Hitler and the family's escape to London in 1933 when Lucian was 10. Sigmund Freud was his grandfather and Ernst, his father was an architect. In London in his twenties, his first solo show was in 1944 at the Lefevre Gallery. Around this time, Stephen Spender introduced him to Virginia Woolf; at night he was taking Pauline Tennant to the Gargoyle Club, owned by her father and frequented by Dylan Thomas; he was also meeting Sonia Orwell, Cecil Beaton, Auden, Patrick Leigh-Fermor and the Aly Khan, and his muse was a married femme fatale, 13 years older, Lorna Wishart. But it was Francis Bacon who would become his most important influence and the painters Frank Auerbach and David Hockney, close friends. This is an extremely intimate, lively and rich portrait of the artist, full of gossip and stories recounted by Freud to Feaver about people, encounters, and work. Freud's art was his life—"my work is purely autobiographical"—and he usually painted only family, friends, lovers, children, though there were exceptions like the famous small portrait of the Queen. With his later portraits, the subjects were often nude, names were never given and sittings could take up to 16 months, each session lasting five hours but subjects were rarely bored as Freud was a great raconteur and mimic. This book is a major achievement, a tour de force that reveals the details of the life and innermost thoughts of the greatest portrait painter of our time. Volume I has 41 black and white integrated images, and 2 eight-page color inserts.

Plant Cell Walls

Garland Science Plant cell walls are complex, dynamic cellular structures essential for plant growth, development, physiology and adaptation. Plant Cell Walls provides an in depth and diverse view of the microanatomy, biosynthesis and molecular physiology of these cellular structures, both in the life of the plant and in their use for bioproducts and biofuels. Plant Cell Walls is a textbook for upper-level undergraduates and graduate students, as well as a professional-level reference book. Over 400 drawings, micrographs, and photographs provide visual insight into the latest research, as well as the uses of plant cell walls in everyday life, and their applications in biotechnology. Illustrated panels concisely review research methods and tools; a list of key terms is given at the end of each chapter; and extensive references organized by concept headings provide readers with guidance for entry into plant cell wall

literature. Cell wall material is of considerable importance to the biofuel, food, timber, and pulp and paper industries as well as being a major focus of research in plant growth and sustainability that are of central interest in present day agriculture and biotechnology. The production and use of plants for biofuel and bioproducts in a time of need for responsible global carbon use requires a deep understanding of the fundamental biology of plants and their cell walls. Such an understanding will lead to improved plant processes and materials, and help provide a sustainable resource for meeting the future bioenergy and bioproduct needs of humankind.

Glycotechnology

Springer Science & Business Media Glycotechnology brings together in one place important contributions and up-to-date research results in this fast moving area. Glycotechnology serves as an excellent reference, providing insight into some of the most challenging research issues in the field.

The Elements of a Home

Curious Histories behind Everyday Household Objects, from Pillows to Forks

Chronicle Books The Elements of a Home reveals the fascinating stories behind more than 60 everyday household objects and furnishings. Brimming with amusing anecdotes and absorbing trivia, this captivating collection is a treasure trove of curiosities. With tales from the kitchen, the bedroom, and every room in between, these pages expose how napkins got their start as lumps of dough in ancient Greece, why forks were once seen as immoral tools of the devil, and how Plato devised one of the earliest alarm clocks using rocks and water—plus so much more. • A charming book for anyone who loves history, design, or décor • Readers discover tales from every nook and cranny of a home. • Entries feature historical details from locations all over the world, including Europe, Asia, North America, and Africa. As a design historian and former managing editor of Design*Sponge, author Amy Azzarito has crafted an engaging, whimsical history of the household objects you've never thought twice about. The result is a fascinating book filled with tidbits from a wide range of cultures and places about the history of domestic luxury. • Filled with lovely illustrations by Alice Pattullo • Perfect for anyone who adores interior design, trivia, history, and unique facts • Great for those who enjoyed The Greatest Stories Never Told: 100 Tales from History to Astonish, Bewilder, and Stupefy by Rick Beyer, An Uncommon History of Common Things by Bethanne Patrick and John Thompson, Encyclopedia of the Exquisite: An Anecdotal History of Elegant Delights by Jessica Kerwin Jenkins

Primate School

Gorillas using iPads, lemurs finger painting, squirrel monkeys popping bubbles . . . these primates are pretty smart! Could you make the grade in Primate School? Learn how diverse the primate family is, and some of the ways humans are teaching new skills to their primate cousins. Author Jennifer Keats Curtis is once again working with organizations across the country to share fun facts about primates through this photo journal.
